## **“Emerging Concepts in Internal Medicine”**

### ***Highlighting the Education Program are:***

- Daily plenary sessions on the latest advances in each internal medicine subspecialty area, with special sessions in the newest areas of specialization, sleep and palliative medicine....
  - A Keynote address entitled “A Case Study in Medical Innovation: The Science of Bioelectronics,” by visionary physician-inventor, Mark Humayun, MD, on advanced biomedical therapeutics... .
  - An advanced-level education session specifically for cardiologists on recent trends in that subspecialty....
  - A series of sunrise sessions on practice management and technology topics to help you understand emerging issues....
  - Daily sessions offering osteopathic approaches to commonly-faced internal medicine diagnoses....
  - A full day preliminary session on End-of-Life and Palliative Care that provides a certificate of completion for participants....
  - Registration includes welcome reception, daily breakfasts, luncheon symposia and admission for one to the President’s Banquet on November 1.
