Learning Objectives
At the completion of this program, participants will be able to:

- Articulate the multiple indications for antithrombin therapy including bleeding risks and management;
- Delineate the classifications of Diastolic Heart Failure and different treatment options;
- Describe the most recent developments in non-invasive ventilation techniques;
- Develop strategies for managing the complexities in the treatment of the obese patient with pulmonary complications
- Identify the optimal approaches for managing the side effects of newer chemotherapeutic agents;
- Describe the principles of blood product utilization as well as evaluation and management of hypercoagulable states;
- Discuss strategies for managing acute stroke, improving compliance with sepsis management, and appreciating the role of new biomarkers in management of infected patients while improving antibiotic stewardship;
- Demonstrate the proper coding and billing of acute care patient visits;
- Improve recognition and management of common endocrine emergencies
- Describe best practices in improving glycemic control in the hospitalized patient;
- Describe the proper use and management of nutrition in end of life situations;
- Relate best practices in care for late stage liver failure patients;
- Describe the evolving changes to MACRA/MIPS and their impact on current hospital practice as well as hospitalist impact on Bundled Care Payment Initiative.

Outcomes - This activity will provide internists and subspecialists updates in the areas of healthcare administration, cardiology, pulmonary, critical care medicine, infectious diseases, gastroenterology, hematology/oncology, internal medicine, etc., empowering them to provide improved care to their patients. Outcomes will be assessed via immediate and time delayed post-tests assessing intent to change practice behavior, and self-report of changes.

CME Credit: 26.75 Category 1A Internal Medicine CME credits are anticipated for this program.

The American College of Osteopathic Internists (ACOI) is accredited by the American Osteopathic Association (AOA). ACOI designates this live activity for a maximum of 26.75 AOA Category 1-A Specialty (internal medicine) CME credits to be awarded. Physicians should claim only the credit commensurate with the extent of their participation in the educational activity.

Practice Gap - Internists have very busy practices, and it is impossible for them to keep updated on all the medical advances and structural initiatives related to the myriad of clinical cases that are presented to them. This conference will address key gaps that have been found to exist in hospital-based internists' practices. These gaps were determined through literature reviews, population health data reported by the CDC and quality measurement sources (e.g., AHRQ, NCQA), and ongoing survey activities within ACOI.

Target Audience - This activity is designed for internists, subspecialists and other health professionals who are hospital-based clinicians.
