A long time ago (around 500 BC), the Greek philosopher Heraclitus noted that change is constant. His example was that one could never step in the same river twice. It constantly flows and changes. The ACOI is not an exception to this rule. We cannot control change. We can control how we adapt to change. How we adapt to change drives outcomes. The outcomes apply organizationally, professionally, and personally.

What it means to improve the health of patients and populations is also constantly changing. Our ability to adapt to changes in medical science is a great example of this. I can only imagine...
Letter from the President continued from page 1

suggested to one of my medical school teachers that a patient with heart failure should be treated with a beta blocker. I would not have passed that test. Today, not considering the beta blocker in the same patient would be incorrect. We adapt as scientific discovery flows. This same phenomenon happens in the non-scientific parts of medical practice. Social norms change; we must adapt if we are to provide high quality care to patients and populations. Organizations like the ACOI continue to flow. The direction is determined by the members’ values – the river bed. The role of leaders is to keep the boat on the water. While leaders may attempt to divert or disrupt the flow, nature (the will of the member) always prevails.

It is an honor to be the President of the ACOI. It is a vibrant and relevant organization. Relevance is driven by the competence and professionalism of its members. This is encompassed in the Mission of the ACOI: to promote high quality, distinctive osteopathic care of the adult. This Mission, re-stated by the Board this year, highlights our commitment to the health of patients and populations. It is our river bed. It is why I get up in the morning. It is why the ACOI resonates with me.

Organizational leaders will continue to come and go. The heart of any organization is its members. As a profession, we have a higher purpose. I’m humbled that I could play a small part in furthering our mission and serving our members.

I.M. Training Numbers continued from page 1

DUAL PROGRAMS – The survey captured data on whether the responding programs are also approved by the ACGME. Thirty-one programs reported dual approval. Seven programs reported that they have dropped their AOA-accreditation this year due to transition to ACGME-accreditation. Dually-approved programs are training 294 residents (including combined EM/IM and IM/PEDS). That is 22 fewer residents than last year. Dual programs account for 22% of all programs, with 15% of all residents.

SUBSPECIALTY TRAINING – The number of osteopathic fellowship programs has decreased while positions filled grew. One-hundred-sixteen programs are actively training fellows, up from 106 last year. The number of subspecialty programs decreased to 145 (three fewer than 2015-16) with 650 approved positions, an increase of six. There are now 434 fellows training, which is up from 369 fellows last year.

LAST YEAR’S GRADUATES

The online Resident Annual Reports require graduating residents to report their future plans. For June 30, 2016 graduates, here are the results. Comparisons are to 2015 data:

<table>
<thead>
<tr>
<th>TOTAL GRADUATES:</th>
<th>517 (+32)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Entered Practice</td>
<td></td>
</tr>
<tr>
<td>Office-Based IM</td>
<td>315 (61%)</td>
</tr>
<tr>
<td>Hospitalist</td>
<td>234 (74%)</td>
</tr>
<tr>
<td>Combined Office/Hospitalist</td>
<td>20 (6%)</td>
</tr>
<tr>
<td>Emergency Medicine/Peds</td>
<td>9 (3%)</td>
</tr>
<tr>
<td>Entered Subspecialty Training</td>
<td>202 (39%) (+6%)</td>
</tr>
</tbody>
</table>

Despite the increase in the number of graduates, for the first time there was a decline in the number who sat for the AOBIM certifying exam in internal medicine. Four-hundred-thirty-four (434) took the exam, which was 23 fewer than last year. There were 32 more graduates this year than in 2015. The decline may be attributed to the fact that graduates of programs that receive initial accreditation from the ACGME are eligible to sit for both the AOBIM and ABIM certifying examinations.
ACOI and Others Advocate for OMT Reimbursement
The ACOI along with other osteopathic organizations successfully lobbied National Government Services (NGS), a Medicare contractor, to issue a final Local Coverage Determination (LCD) allowing for proper reimbursement of osteopathic manipulative treatment (OMT) services. The ACOI opposed the draft LCD released earlier this year by NGS contending that it failed to allow for access to appropriate care for patients and would result in greater confusion for physicians. The final LCD addressed the concerns raised by the ACOI and others by updating existing coverage guidelines in 10 states (CT, IL, MA, ME, MN, NH, RI, VT and WI). You can review the ACOI’s submitted comments at http://www.acoi.org/pdf/August12.2016.pdf.

CMS Announces Flexibility for Physician Participation in Quality Reporting
The Centers for Medicare and Medicaid Services (CMS) recently announced that it will provide greater flexibility for physicians to participate in the newly-created physician payment models established under the Medicare Access and CHIP Reauthorization Act (MACRA). The increased flexibility announced by CMS is in direct response to feedback provided by the ACOI and other physician organizations in an effort to facilitate successful implementation of the new payment models. According to CMS, physicians will be able to choose to participate using one of the following four options: test the quality payment program; participate for part of the calendar year; participate for the full calendar year; or, participate in an Advanced Alternative Payment Model in 2017. According to a blog post by CMS Acting Administrator Andy Slavitt, “Choosing one of these options would ensure you do not receive a negative payment adjustment in 2019.” Additional information will be made available in a final rule expected to be released by November 1. The ACOI will provide information as it becomes available.

HHS Issues Final Rule to Improve Transparency for Clinical Trials
The Department of Health and Human Services recently published a final rule to improve the transparency of clinical trials by making results more readily available to the public. The rule details requirements for registering and submitting results for clinical trials involving drugs, devices and biologic products regulated by the Food and Drug Administration (FDA). The final rule requires the registration of a clinical trial within 21 days after enrolling the first participant. In addition, the rule now requires the submission of summary data and the reporting of adverse events within one year of completing the clinical trial. The final rule takes effect on January 18, 2017 and requires compliance within 90 days thereafter. The National Institutes of Health (NIH) simultaneously issued a policy extending registration and reporting requirements to all NIH-funded research. According to a statement by NIH Director Francis S. Collins, MD, PhD, “Access to more information about clinical trials is good for patients, the public and science.” Additional information is available at www.ClinicalTrials.gov.

House Committee Advances Public Health Legislation
During a recent markup session, the House Energy and Commerce Committee advanced five bipartisan public health bills. The legislation reported out favorably by the Committee would do the following: establish a commission to advance better coordination of federal programs providing care for people with diabetes and related metabolic syndromes and disorders; expand data collection to promote the placement of mental health professionals in appropriate geographic locations; provide grants to provide mental health awareness training for first responders, law enforcement, teachers and others; reauthorize grants and scholarships for nursing education; and, amend the Controlled Substance Act to enable paramedics and other emergency medical service professionals to continue to administer controlled substances pursuant to standing orders. These bills now await action by the full House.

Number of Uninsured Decreases
According to a recently released report by the Centers for Disease Control and Prevention (CDC), the number of uninsured people fell to 27.3 million (8.6 percent) in the early part of 2016. This represents a decrease from 28.6 million (9.1 percent) during the same time period in 2015. Compared to the rate of uninsured persons in 2010, 21.3 million fewer people lacked insurance coverage in 2016. The report also found the number of those uninsured for at least part of the past year and those uninsured for more than a year fell from 51 million to 33.2 million and 32 million to 4.6 million, respectively. You can learn more at www.cdc.gov.

Washington Tidbits
Lights, Camera, Action!
The art of campaigning in the US has changed significantly over the years to include new media such as Twitter, Facebook and other social media. To put it into perspective, though, the televised presidential debate was also a new tool at one time that arguably had the potential to change the trajectory of a tight race.

On September 26, 1960, 61.9 million households tuned in to view the first-ever televised presidential debate. The debate was between Richard M. Nixon and John F. Kennedy. Fifty-six years to the day, Donald Trump and Hillary Clinton appeared before a record-breaking 84 million households in the largest-ever viewing of a televised presidential debate. This record, however, fails to measure the full scope of those viewing proceedings through newer platforms such as the Internet. As a result, many more than the 84 million accounted for likely watched the debate. With two more presidential debates scheduled, there is plenty of time for the tides of the 2016 race for the White House to change more than once thanks to ever-expanding tools to reach the electorate!
Timely Completion and Signing of Medical Records

One concern I often hear from billing staff has to do with the timely completion of medical records. This issue has both billing and compliance ramifications. A recent Medicare seminar I attended provided some interesting information on this topic that I thought I would share with you this month.

For billing purposes, Medicare generally requires the following:

1. The medical record should be complete and legible.

2. The documentation of each patient encounter should include:
   - Reason for the encounter and relevant patient history, physical examination findings and prior diagnostic test results;
   - Assessment, clinical impression or diagnosis;
   - A plan for care; and
   - A date and legible identity of the observer.

While the issue of legibility has been largely addressed by increased utilization of electronic health records (EHRs), completion of the record through the inclusion of proper documentation and a dated signature continues to be of concern. What does it mean for a medical record to be complete? Is the record complete when it contains the documentation of the patient encounter but is not signed and dated? As you know, you should not bill for an office visit or other service until documentation is on file supporting the level of service or code indicated for billing. The file is not complete until the proper documentation is accompanied by a dated signature. The question becomes, “How long do you have to sign and date the record in order for it to be accepted by CMS?” The question is most important because EHR systems do not allow for back-dating of a signature. As such, an auditor knows exactly when the signature of the provider was placed in the record. How long is too long after the care is provided?

If you go to the website of your Medicare Administrative Contractor (MAC) you might find the answer. The CMS/Medicare policy manual is specifically vague to allow the regional MAC’s medical directors the opportunity to set policy for their regions. As a result, the answer as to timing varies from region-to-region. CMS’s vague guidance is found in Chapter 12 of the Manual in the following statement, “The service should be documented during, or as soon as practicable after it is provided in order to maintain an accurate medical record.”

So what is your “requirement” for a timely signature? Check with your MAC. Some give reasonable direction, like WPS which states, “A reasonable expecta-
Well, for those of us in the east, summer is finally abating and crisp autumn nights offer relief from high air conditioning bills.

In working with several programs on their applications for Osteopathic Recognition (OR), the question has arisen as to whether the term “resident” refers only to residents. The answer is no. “Resident” refers to interns, residents and fellows and is consistent with the ACGME’s Glossary of Terms. For those program directors seeking OR, I urge you to visit the OR section at ACGME.org and review the FAQs. Also, I am always available to help with your efforts to secure OR.

Diabetes Dialogues

Fixed Dose Glargine and Lixisenatide Show Benefits in Patients with Poorly Controlled T2DM on Glargine Alone

For patients with inadequately controlled, basal insulin-treated type 2 diabetes, a novel, titratable, fixed-ratio combination of insulin glargine (iGlar) and lixisenatide (iGlarLixi) is associated with improvements in glycemic control and reduced body weight, according to a study published online Sept. 20 in Diabetes Care.

Vanita R. Aroda, MD, from the MedstarHealth Research Institute in Hyattsville, MD, and colleagues examined the efficacy and safety of iGlarLixi compared with iGlar in patients with type 2 diabetes inadequately controlled on basal insulin with or without up to two oral glucose-lowering agents. Seven-hundred thirty-six basal insulin-treated patients were randomly allocated to open-label once-daily iGlarLixi or iGlar.

The researchers found that during the six-week run-in period there was a decrease in hemoglobin A1c (HbA1c) from 8.5 to 8.1 percent. Greater reductions in HbA1c from baseline were seen for iGlarLixi versus iGlar after randomization (−1.1 versus −0.6 percent; P < 0.0001), reaching a mean final HbA1c of 6.9 and 7.5 percent for iGlarLixi and iGlar, respectively. Fifty-five and 30 percent of patients on iGlarLixi and iGlar, respectively, reached a final HbA1c <7.0 percent. The change in mean body weight was −0.7 kg with iGlarLixi and +0.7 kg with iGlar, respectively (P < 0.0001).

“iGlarLixi achieved superior improvements in glycemic control, with beneficial effects on body weight, no additional risk of hypoglycemia compared with iGlar, and a low rate of gastrointestinal adverse effects.”

Donald S. Nelinson, PhD

Celebrating the First 75 Years of the ACOI

The California division of the American Society of Osteopathic Internists reorganized in 1941 to form the American College of Osteopathic Internists. In the 75 ensuing years there has been a great deal of change in the science and practice of medicine. One constant, though, has been the commitment of the ACOI’s members to the profession and to providing the highest quality of care to their patients. Through the tireless efforts of Kevin P. Hubbard, DO, MACOI, the history of the College and its members has been recorded in a new book titled, “A History of Osteopathic Internal Medicine: Celebrating the ACOI’s First 75 Years.” The book, which chronicles the shaping of this remarkable profession, will be formally released at the 2016 Annual Convention and Scientific Sessions October 27-31 in Palm Desert, California. We look forward to seeing you in California where it all began! Registration and additional information is available at www.acoi.org.
GREAT PRIMARY CARE OPPORTUNITY, PA - Internal Medicine Physician needed to join large hospital employed primary care practice. BC/BE candidates interested in either an outpatient-only focus or a traditional model of both outpatient and inpatient care will find this a great opportunity in one of the “Most Livable Cities in America”! The Fatigati/Nalin Practice is currently a 10 physician group that is part of the St. Clair Hospital employed physician network. St. Clair is located in a neighborhood community of Pittsburgh that has gained a regional and national reputation for quality and financial performance. The practice has a culture of patient quality and efficiency and salary potential is commensurate with a highly productive model. Call rotation is a liberal 1:5 and inpatient duties are rotated a week at a time. Benefits are offered in a competitive model with all typical hospital employed elements including: sign on bonus, vacation, Paid CME, health, dental, life and disability insurance as well as a competitive retirement plan.

See more information on St Clair Hospital and the Fatigati/Nalin Practice by clicking on these links: http://www.stclair.org/; http://fatigatipcp.org/

Interested applicants contact: Chuck Rakaczky, Vice President, Physician Services St. Clair Hospital, 412-942-6235, chuck.rakaczky@stclair.org

HEMATOLOGY/ONCOLOGY OPPORTUNITY, SOUTHERN NJ - Highly regarded four-physician hematology/oncology practice in Southern New Jersey, has an excellent opportunity for a BC/BE full-time medical hematologist/oncologist. We are located 45 minutes from Philadelphia and close to Atlantic City, NJ. We offer hematology and oncology services in two locations with chemotherapy suites and laboratory services. Practice is associated with Regional Cancer Care Associates. We also offer a competitive salary and generous benefit package; including 4 weeks of vacation, 1 week of CME, health, dental, 401(k), and malpractice, leading to full partnership. Interested candidates please submit your CV by email to Dr. Kaleem Ahmad, MD at kahmad@regionalcancercare.org, or fax 609-390-2614.

INFECTIOUS DISEASES FELLOWSHIP POSITION- SOUTHERN NEW JERSEY - Rowan University- School of Osteopathic Medicine is approved for two fellowship positions in Infectious Diseases beginning July 1, 2017. The fellowship is accredited by the American College of Osteopathic Internists. The program is affiliated with Kennedy University Hospital, which is accredited by The Joint Commission and the American Osteopathic Association. The program trains physicians for clinical medicine, encompassing general infectious diseases, HIV/AIDS, travel medicine, hospital epidemiology, and infection control.

Eligible applicants must have graduated from an AOA accredited medical school and have completed an internal medicine residency program. To request an application for the position, please send your curriculum vitae to Program Director Todd Levin, DO (tlevin@gsida.org) or apply via the Electronic Residency Application Service (ERAS).

INTERNAL MEDICINE FACULTY MEMBER, OR - Join Western University of Health Sciences in Lebanon, Oregon as Internal Medicine faculty member! See listing at https://jobs.westernu.edu/postings/6196.

NEPHROLOGY FELLOWSHIP OPPORTUNITY, MI - Seeking applicants for July 2017 AOA Accredited Nephrology Fellowship in Detroit, MI. Fellows will rotate with 8 staff nephrologists at Beaumont-Farmington Hills, Garden City Hospital, and St. John Macomb Oakland Hospitals; engage in busy Livonia outpatient clinic; round on a large outpatient hemo and peritoneal dialysis population; have transplant training at Henry Ford or St John Hospitals; as well as many other exciting opportunities. Interested applicants please contact Michael Misuraca DO FACOI at mike91976@aol.com.

PRIMARY CARE PHYSICIAN, SILICON VALLEY, CA - Santa Clara Valley Medical Center, a public teaching hospital, affiliated with the Stanford University School of Medicine, located in the heart of Silicon Valley, CA is seeking a BC/BE Internal Medicine-primary care physician to join our dynamic, growing, nurturing Department. Submit a letter of intent and CV to roya.rousta@hhs.sccgov.org. EOE Employer.

MEMBER MILESTONES

Robert G. Good, DO, FACOI, of Mattoon, IL, has been named Chief Medical Officer of Health Alliance for the Carle Health System. Dr. Good previously served as Carle’s Medical Director of Clinical Integration Operations leading various population health initiatives in the clinical setting. In his new position he will help align care management across the Carle system. Dr. Good is a general internist who served on the ACOI Board of Directors and was President of the College in 2012-13.
Why ACOI Needs Our Support

(This is one in a series of interviews with ACOI members who are strongly committed to the College and why they believe it has made a difference in their lives. This series is presented by Barbara L. Ciconte, CFRE, Development Counsel to ACOI.)

Meet W. W. Stoever, DO, MACOI, a practicing Cardiologist from Tulsa, OK at Oklahoma State University Center for Health Sciences. He has been an ACOI Member for over 50 years. Dr. Stoever has practiced family medicine, internal medicine and cardiology. He is a past ACOI Board member, served as ACOI President in 1991-1992 and participated on the 75th Anniversary Task Force.

Ms. Ciconte: Tell me why your ACOI membership is important to you and why you committed your time in the past to serve as ACOI President and a member of the ACOI Board of Directors.

Dr. Stoever: I started my career as an osteopathic internist more than 40 years ago and continue to practice medicine today. In the early days, unlike allopathic medical schools, we did not have the finances to run our osteopathic medical schools. I recall when a new school was being created in Tulsa in the 70s, the state association asked DOs to teach at the school for three years for free. I agreed, as did a number of others, because it was our way of giving back to our profession and insuring a new generation of osteopathic physicians assisting their patients.

The same is true of my involvement in ACOI. Dr. B.B. Baker, an internist at my hospital in Tulsa, was serving as the ACOI President. At that time, ACOI’s Board was made up of members from larger hospitals than ours so when his term was over he nominated me to join the ACOI Board. So, that’s how I started my involvement with the College even before Brian Donadio came on as ACOI’s Executive Director.

Being a member and having the opportunity to serve ACOI has been one of the hallmarks of my career. I feel like I am part of a family.

Ms. Ciconte: You recently served on the 75th Anniversary Task Force. What are you most proud of that the College accomplished?

Dr. Stoever: Given my long history with ACOI, I was proud to serve on the 75th Anniversary Task Force. ACOI will be celebrating this anniversary in a variety of ways at the upcoming Annual Convention in October in Palm Desert, CA. I hope many members plan to be there.

There are a number of things I am proud of about the College, but the one I believe is most important is its role in improving postgraduate education.

Ms. Ciconte: What should ACOI focus on for the next five years?

Dr. Stoever: In my mind, ACOI is education. We need to keep our educational programs and annual conventions alive by continuing to feature the best speakers who bring the latest research, treatments, and practices to our attendees. The strong sense of family you feel at the ACOI annual conventions brings many of the older doctors back each year, while at the same time it introduces “our family” to medical students and residents who will choose to be involved with the College.

Ms. Ciconte: You have given much to ACOI over the years through your leadership, mentoring future leaders, and support. What would you say to fellow ACOI members to encourage them to contribute?

Dr. Stoever: With the challenges facing osteopathic internal medicine today, the ACOI needs our support more than ever. Join me in continuing our practice of giving back to our profession by making a generous contribution during this 75th Anniversary celebration.

Ms. Ciconte: Dr. Stoever, ACOI thanks you for the many ways you have helped the College grow and prosper over the years.
Elections Set for October 31

Nominations for ACOI Leadership Positions Announced

The ACOI Nominating Committee has announced the slate of candidates for election at the Annual Meeting of Members scheduled for Monday, October 31 in Palm Desert, CA. The Committee has nominated Martin C. Burke, DO, for President-Elect and Annette T. Carron, DO, for Secretary-Treasurer. The Nominating Committee also approved four candidates for election to the Board of Directors. Incumbents Scott L. Girard, DO, Robert T. Hasty, DO and Samuel K. Snyder, DO are nominated for new three-year terms. Damon L. Baker, DO, completes the slate. Under the College’s Bylaws, this year’s President-Elect, John R. Sutton, DO will be inaugurated as President for the 2016-2017 year at the conclusion of the elections. Complete biographical information about each of the candidates appears in the July, 2016 issue of ACOInformation.

The Nominating Committee this year is chaired by Judith A. Lightfoot, DO. Also serving are Michael A. Adornetto, DO, MBA and Robert L. DiGiovanni, DO.

Your IRA Can Help ACOI and Save You Taxes!

You can help ACOI and yourself at the same time if you have an Individual Retirement Account (IRA) and are at least 70 1/2 years of age. This is because you can now have a portion or all of your required minimum distribution (up to $100,000) paid directly to ACOI.

By doing this you will not have to take the required amount as income and pay taxes on it. Instead, you can have any amount you want – up to $100,000 – paid to ACOI by making a Qualified Charitable Distribution.

You do not receive a tax deduction for this distribution, but you also do not receive it as income, and therefore do not pay income taxes on it. In addition, the amount you have paid to ACOI will count toward the minimum distribution required by law that you must receive from your IRA. For many who want to help ACOI, this is a win-win scenario, but planning is important. You should let us know if you want to help in this way because you need to notify your IRA administrator at least six weeks in advance and before you take your distribution.

In addition to providing help from your IRA now, click here to request a copy of Your IRA Legacy our popular, easy-to-understand, non-technical brochure that will tell you about other tax-wise considerations for using your IRA.

A combination of estate and income taxes can severely deplete the retirement savings accounts of many people after death, leaving little left for heirs. The tax bite can be as high as 60%! The solution? Name ACOI as the death beneficiary. Alternatively, you can leave your retirement account to a trust that will pay income for life – or for a fixed term of years – to a spouse or family member and ACOI would benefit only when the trust comes to an end. Doing this can provide income tax deferral and avoid so called “death taxes,” as well.

There are other suggestions in the brochure you will want to read. If you would like to know more, click here to request a copy of Your IRA Legacy in the mail. If you already know that you would like to have an ACOI planned giving consultant call you, email us and let us know how and when to contact you.

Tax Saving Seminar at Annual Convention

As part of a continuing series of estate and tax planning seminars at the ACOI Annual Convention, Sandy Macnab, FAHP, CFRE, President, Alexander Macnab & Co., will present “2016 Update: Gaining through Giving - Doing Well While Doing Good,” a Sunrise Session (7 am) on Friday, October 28. Mr. Macnab is a nationally recognized planned giving consultant to associations, medical societies, and nonprofit organizations who is now working with ACOI.

Learn how you can help yourself (and your family) and help ACOI at the same time. In this session you will get an executive overview of how charitable gifts can help you with tax and estate planning issues and you will learn about ways that you can make gifts that can return income for your life, or that can help your children or grandchildren. While you will get information on the basics, the session will focus on two plans that give you money back and then go on to help ACOI programs.

New Members Welcomed

The ACOI Board of Directors and staff welcome the following members whose membership applications or changes in membership status have been approved by the Credentials Committee and Board of Directors.

Active Membership

Jaclyn Brancato, DO
Patricia Chun, DO
Nicholas Crawford, DO
Lyndsi Davenport, DO
James Diener, DO
Steven Do, DO
Julie Gompers, DO
Michael Guzman, II, DO
Farooq Junaid, DO
Jason Lakatos, DO
Vikram Lal, DO
Gabriel Lerman, DO
Andrea Lorio, DO
Neil Okamura, DO
David Pak, DO
Michael Richins, DO
Krystal Samuel, DO
Cole Sedar, DO
Jessica Smith-Kelly, DO
Ashley Zinda, DO

Associate Membership

G. Scott, Smith, MD
James West, MD
Notice to Members—ACOI Bylaws Amendments

Active members of the ACOI who attend the Annual Meeting of Members on October 31, 2016 in Palm Desert, CA, will vote on proposed amendments to the ACOI Bylaws. The first set of amendments, to Article II, Membership, would provide eligibility for Active membership in the College for MDs who are affiliated with, or graduates of, ACGME-accredited internal medicine training programs that have achieved Osteopathic Recognition. A similar provision would make Student membership available for certain medical school students. These amendments reflect the transition to the single GME accreditation system now underway.

The second proposed amendment, to Article XI, Amendments, would delete a provision that calls for AOA Board of Trustees approval of amendments to the ACOI Bylaws. The full text of the proposed amendments appears below.

ARTICLE II: MEMBERSHIP

Section 2. Active Member. Those persons to be elected to Active membership under these Bylaws shall be approved by a two-thirds (2/3) vote of the Board of Directors. Only those candidates who have the following requisites may be voted upon for Active membership by the Board of Directors: Active membership in the College shall be available to physicians who possess the United States degree of doctor of osteopathic medicine (DO), or doctor of medicine (MD) (or a recognized international equivalent), and who:

1. be a graduate of a college of osteopathic medicine approved at the time of graduation by the Commission on Osteopathic College Accreditation;
2. possess a valid license to practice in the state in which he or she practices;
3. be of good moral character and conform with the Code of Ethics of the American Osteopathic Association;
4. Have satisfactorily completed, or are affiliated with, a graduate medical education program in internal medicine approved by the American College of Osteopathic Internists, Inc., and by the American Osteopathic Association, or the Accreditation Council for Graduate Medical Education (ACGME);
5. show evidence of active practice of internal medicine, or in education, research, or administration.

Those persons to be elected to Active membership under these Bylaws shall be approved by a two-thirds (2/3) vote of the Board of Directors.

Section 8. Student Members. Those persons who are enrolled as students in a college of osteopathic medicine approved by the Commission on Osteopathic College Accreditation or the Liaison Committee on Medical Education, and who have an interest in the field of internal medicine and osteopathic principles, may be elected to Student membership in the College. Student members may attend all business meetings of the College. Student members may not have the right to vote or hold office.

ARTICLE XI AMENDMENTS

These Bylaws may be altered, amended or repealed by a two-thirds vote of the members present at any annual or special meeting of members, provided that the amendment shall have first been presented in written or printed form, and that a copy of said proposed amendment shall have been mailed to all members at least thirty (30) days before being submitted for vote. All amendments to become effective must have the approval of the Board of Trustees of the American Osteopathic Association.

Prognostication: Updated from the Literature
Marianne M. Holler, DO, FACOI

9:00 - 9:30 AM
Annual Meeting of Members

9:30 AM
Convention Concludes
REGISTRATION INFORMATION

EDUCATION SESSION FEES
Fees for the 2016 education sessions are based on ACOI membership status and length of time in practice. Active members (training completed prior to 6/30/11) pay $745; Young Internists (training completed 6/30/11 or later) pay $645; Emeritus and Retired members pay $645; Residents and Fellows pay $495 ($295 for Research Contest entrants). Non-member Physicians pay $945; Non-Physician Health Care Professionals may register for the ACOI member rate of $745. There is no charge for students. Spouse/guest registration is $125. These fees include a $50 early registration discount, which applies until October 5, 2016. Registrations received after that date do not qualify for the discount.

WHAT DOES REGISTRATION INCLUDE?
Physician registration for the Convention includes entry to all education sessions, the Exhibit Hall, daily continental breakfast and luncheon symposia and one ticket to the Opening Reception. Luncheon seating is limited. Spouse/Guest registration includes entry to the education sessions, daily continental breakfast in the Exhibit Hall, and all social events, including one ticket to the Opening Reception. (Due to limited seating, guests may not attend the luncheon symposia.)

HOTEL INFORMATION
The JW Marriott Desert Springs Resort & Spa is the headquarters hotel for the ACOI 2016 Annual Convention and Scientific Sessions. All educational and social events will take place there. ACOI has arranged a discounted room rate of $249 per night (single/double). Additional local taxes apply. Early reservations are suggested as the hotel is likely to sell out and does not have to honor ACOI’s discounted rates after October 5, 2016. Reservation information is available by calling 877-622-3140; or visit https://resweb.passkey.com/go/acoiconvention2016.

PAYMENT INFORMATION
You may register online, by mail or fax for the ACOI 2016 Annual Convention and Scientific Sessions. Secure online registration is available through the ACOI website. Visit www.acoi.org and click on the convention registration link on the home page. You may also use the registration form in the Convention Packet to register by mail or fax. Payment may be by check payable to ACOI or charged on VISA or Mastercard. Complete the required information on the white Registration Form and return it to the ACOI at the address listed on the form.

CANCELLATION POLICY
Please note that refund requests must be made in writing to ACOI prior to October 5, 2016. A processing fee of $50 will be charged for cancellations received at any time. No refunds will be made after October 5, 2016, but unused registration fees may be applied toward a future ACOI education program.

ACOI GENERATIONAL ADVANCEMENT PROGRAM
Donations are requested to assist the ACOI in providing a medical textbook to each resident and student registered for the Convention. Textbook prices average $100. In addition, the ACOI provides grants to representatives of the internal medicine clubs on the campuses of osteopathic medical schools to defray the cost of attending the Convention. All contributions are acknowledged in the printed program and received prior to the publication deadline. Suggested donation is $100, but contributions in any amount are welcome. Your donation may qualify as a tax deductible charitable contribution. ACOI is a 501(c)(3) organization and no goods or services are provided in return for the contribution. A separate receipt will be provided for your records.
