I recently saw a quote by Maya Angelou, “There is no greater agony than bearing an untold story inside you.” This stuck with me as I have often thought, and have heard many people say, “I need to write a book about that.” In fact, I have told many family members, patients, and even new acquaintances when I hear just part of a story they are telling, “You need to write a book.” The book I have in my head is telling individual stories of patients at the end of life. I will never cease to be surprised at the often utter shock when I tell the family of a 90-something-year-old patient that he/she may be at the end of their life. The patient on the other hand is never shocked. I want to write a book that helps people tell their story, even to their own family, and in some small way begin the goodbye, so the family focuses on celebrating how many years they got with their loved one, rather than
**Letter from the President**

*continued from page 1*

denying death.

I often find myself explaining to families the story of a patient’s disease course and that is why I can help predict the future course and that death may be near. I help define the patient’s goals for care based on what the family believes the patient would want. It is always better to ask the patient their goals, but, unfortunately, we often begin the conversation too late and the patient is too confused or sick to share their wishes. This is where the sadness and shock should be--- that we never talked to our loved one about how their story of life should end. I dislike calling the patient’s disease course a story, as I prefer to hear the story of a patient’s life, not disease, but I find families understand and accept this disease course analogy the best.

We as physicians hear stories of our patients every day. We, unfortunately, often neglect our own story--- our health, our family and our own personal joy. I recently attended a conference put on by a company that helps physicians find ways to earn non-clinical income. I attended one conference topic, but next door was a session on the physician as writer. I loved this!! Our insight into human nature, suffering and family interactions, not to mention joy, is irreplaceable. I thought the physician as writer is a win-win: cathartic for physician health and priceless for the reader.

Life review is a good way for you or your patients to begin to write their story for family. Formal questionnaires are available online. You can also encourage family members to simply ask their loved one to “Tell me the story of your life,” and “Tell me what you hope for, for whatever time you have left,” as ways to help families and patients face a serious illness.

For you as our ACOI member, take advantage of whatever you can that offers help for physician wellness. This is an important topic to ACOI and many other hospitals/physician organizations. Let us know at ACOI if we can help reduce your stress in any way. These are tumultuous times for all. Take time to make the next chapter of your story a good one. Make the job change you have been considering, take the vacation, call the long lost friend, or write your book.

Take time to think about your story. Is it one of mostly work? Regrets? Family? Giving? What would your loved ones think you would want if facing serious illness? Would they know? Do you know what your patients would want? Have you asked? We are here at ACOI to hear your story and to help build it. As always, contact me or any Board/staff member if we can help!

Chapter one . . . .

*Annette T. Carron, DO, FACOI  
President*
State of the Union Address Includes Discussion of Healthcare Policy

President Donald J. Trump recently delivered his annual State of the Union address to a joint session of Congress. While the address touched on the expected areas of border security and economic growth and prosperity, the speech also addressed healthcare-related topics. The President called on both parties in the House and Senate to take legislative action to lower the cost of prescription drugs. It is worth noting that Congress has already begun to explore this issue with recent committee hearings reflecting bipartisan effort. The President also called on Congress to approve legislation to prevent late-term abortions. The address included the announcement of an initiative to end new HIV infections by as much as 90 percent in 10 years. The President concluded the healthcare portion of his address as an opportunity for the President to review the past year and set forth the policy priorities for the upcoming one. It is primarily to act on the policy recommendations put forth.

Legislation Introduced to Increase Medicare-Funded Residency Positions

Legislation was introduced in the Senate to increase the number of Medicare-funded residency slots by 15,000 over five years. A report recently released by the Association of American Medical Colleges (AAMC) estimates a physician shortage of between 42,600 and 120,000 by 2030 in the United States. Currently, the number of Medicare-funded training slots is capped at 1996 levels. The legislation would expand the number of training positions by 3,000 a year for five years. The ACOI will continue to monitor this legislation.

Number of Hospital Acquired Conditions Falls

According to a report recently released by the Agency for Health Research and Quality (AHRQ), the estimated rate of hospital-acquired conditions (HACs) dropped 13 percent from 2014 through 2017. The report estimates that the reduction in HACs resulted in a savings of about $7.7 billion and prevented nearly 20,500 HAC-related inpatient deaths. The Centers for Medicare and Medicaid Services (CMS) Administrator Seema Verma was quoted as saying, “Our work isn’t done and we will continue our efforts to hold providers accountable for delivery results.” You can read the full report at https://www.ahrq.gov/.

Funding for Community Health Centers Receives Bi-Partisan Support

The Republican and Democratic leaders of the Senate Health, Education, Labor and Pensions (HELP) Committee recently introduced and held a hearing in support of legislation to provide five years of mandatory federal funding for community health centers. In addition to funding health centers, the legislation would fund the following: the National Health Services Corps; the Teaching Health Center Graduate Medical Program; the Special Diabetes Program at the National Institutes of Health; and the Special Diabetes Programs for Indians. The legislation awaits additional consideration in the Senate, where it is expected that additional action will be taken.

Incorrect 2019 MIPS Payment Adjustments Identified by CMS

CMS has become aware that some physicians are incorrectly receiving 2019 MIPS payment adjustments on excluded items, including Medicare Part B drugs. CMS is working its contractors to resolve the issue and has asked that the following FAQ be shared:

Q. Should payments for Medicare Part B drugs be included in the 2019 MIPS Payment Adjustment?

A: On February 9, 2018, Congress passed the Bipartisan Budget Act of 2018, which contained provisions that made several changes to the Merit-based Incentive Payment System (MIPS) track of the Quality Payment Program, including no longer calculating the cost of Part B drugs in the low volume threshold.

Recently, CMS discovered an error in the 2019 MIPS payment adjustment applied by the Medicare Administrative Contractors (MACs), which included the payments for Medicare Part B drugs. At this time, the Center for Medicare and Medicaid Services (CMS) is unable to provide an exact date of when impacted clinicians will see the update and correction, but we anticipate an adjustment in the near future. In the event that CMS overpaid a claim based on inclusion of the Medicare Part B drugs, a notification for recoupment will be issued from their MAC on behalf of CMS.

CMS is working as quickly as possible to resolve this issue. No further action is requested of clinicians.

**Telephone, Internet and Electronic Health Record Consultations**

There are four revisions and two new CPT codes on Inter-professional Telephone / Internet / Electronic Health Record Consultations in 2019 that are worth your attention. These changes could have a significant impact on the way you practice medicine. The intent of the codes is to provide compensation for a physician who consults with another physician with specialty expertise in an effort to obtain his/her opinion and advice regarding a particular patient. This interaction becomes billable only when certain requirements are met as set forth in the applicable CPT code and guidelines.

For the Consultant
- The patient may be a new or established one.
- The problem may be a new one, or it may be an exacerbation of an existing one.
- The patient should not have been seen by the consultant within the last 14 days.
- This service should not be reported if the consultation leads to a transfer of care.
- This service should not be reported if the consultation leads to a face-to-face within 14 days, or at the next available appointment date of the consultant.
  - This includes surgery, hospital visits, or a scheduled office evaluation.
- The majority of service time reported (greater than 50 percent) must be devoted to the medical consultative verbal or electronic discussion.
  - This is the most important one because if the “discussion” does not take over 50 percent of the time, the guidelines indicate that a consultation code of this family of codes should NOT be billed.

It is important to note that the requesting provider may be any physician (specialty or primary care), or a non-physician practitioner (NP, PA), but the consultant MUST be a physician. The consultant role cannot be filled by an NP or PA.

Based on the requirements and guidelines for the codes, I recommend documenting all of the following:
- How the conversation took place (verbal or electronic);
- How long the conversation was and what percentage of the total time was spent looking at records and “talking” to the requesting physician;
- Who asked for the consultation;
- What diagnosis or condition the consultation was for;
- If the patient is new or established and, if an established patient whether or not they have been seen in the past 14 days;
- That the conversation did not lead to a transfer or care;
- That the consultant’s recommendations did not include one for the patient to make an appointment, or otherwise be seen with the consultant;
- What the opinion of the consultant physician was and any recommendations.

The majority of the codes are for the “conversational” consultations that include a written report, but there is one that is for the report only.

The codes for the consultant and their descriptors are:

- Inter-professional Telephone / Internet / Electronic Health Record assessment and management service provided by a consultative physician, including verbal and written report to the patient’s treating/requesting physician or other qualified health care professional:
  - 99446 - 5-10 minutes of medical consultative discussion and review
  - 99447 - 11-20 minutes of medical consultative discussion and review
  - 99448 - 21-30 minutes of medical consultative discussion and review
  - 99449 - 31 minutes or more of medical consultative discussion and review
  - 99451 - Inter-professional Telephone / Internet / Electronic Health Record assessment and management service provided by a consultative physician, including a written report to the patient’s treating/requesting physician or other qualified health care professional, 5 minutes or more of medical consultative time
  - 99452 - Inter-professional Telephone / Internet / Electronic Health Record referral service(s) provided by a treating requesting physician or other qualified health care professional, 30 minutes

Looking at what the requesting physician can bill for with his/her time:
- There is also a code for the time the requesting provider spends preparing for the referral and/or communications with the consultant;
- If the patient is in the office at the time of the call and the requirements for prolonged care are met, it is possible that the add-on codes 99354 & 99355 may be billed with the Evaluation and Management service (E&M) for the day;
- If the patient is not in the office, the guidelines indicate consid-

**continued on page 10**
In last month’s population health quiz we asked which state showed the largest percentage point decrease in prevalence of adult smoking between 2012 and 2017. In the past five years, adult smoking declined in all 50 states — decreasing significantly in 39 states and the District of Columbia. The largest percentage point decreases in prevalence of smoking between 2012 and 2017 occurred in Oklahoma (26.1 percent to 19.6 percent).

As we move into updated population health data up to 2018, we see that obesity and chronic diseases continue to negatively impact health and mortality. During 2018, the nation’s obesity rate rose what percent?

A. 22%  
B. 2%  
C. 5%  
D. 15%

Talking Education

In a few weeks I will be attending the 2019 ACGME Annual Educational Conference. This meeting has proven to be a good source for insights and answers to issues related to the graduate training of physicians. In addition to the diverse faculty, valuable peer interaction adds to the benefits conferred by the program. Of particular interest and value to osteopathic educators is the ACGME/AOGME Pre-Conference for Osteopathic Programs and Institutions. This day-long session addresses a full range of topics related to securing and maintaining ACGME accreditation, as well as Osteopathic Recognition. On Saturday, Natasha Bray, DO, MSeD, FACOI, FACP, Chair of the Osteopathic Principles Committee (OPC), and Tiffany Moss, MBA, Executive Director of the OPC, will provide an update on the requirements for Osteopathic Recognition with ACGME. I hope to see some of you March 7-10 in Orlando.

Diabetes Dialogues

Research finds lack of CV risk factor control in diabetes

It’s a challenge that all internists are aware of and aspire to address in their practices. Only one in five adults with diabetes achieved control over multiple risk factor targets for atherosclerotic cardiovascular disease (ASCVD), according to United States registry data published in *Diabetes, Obesity and Metabolism*.1

The Diabetes Collaborative Registry provides multidisciplinary data tracking diabetes and metabolic care through a collaboration of the American College of Cardiology, American Diabetes Association, American College of Physicians, American Association of Clinical Endocrinologists, and the Joslin Diabetes Center.

In this study, investigators examined Diabetes Collaborative Registry data from 74,393 patients with diabetes from 174 practices and 646 office locations. Of these patients, 88% were white, 41% were women, and the average age was 69. Patients’ average body mass index was 32 kg/m2, almost 70% had prior ASCVD, and approximately 14% were current smokers.

Investigators found that 73.6% of patients met individual hemoglobin A1c targets, 69% met blood pressure targets, 48.6% met low-density lipoprotein cholesterol targets, and 85.2% were nonsmokers. However, only 21.6% of all patients achieved composite control of all four risk factors (P < .001). Overall risk factor control rates were lower in women (18.6%) compared with men (23.6%) and in patients who were black (14.7%), white (22.5%), and of other ethnicities (20.8%). Significant differences in rates were observed between patients with (20.7%) and without (23.6%) prior ASCVD.

The study investigators noted limitations to the Diabetes Collaborative Registry, including that the majority of data was collected from white patients and from a high number of cardiology practices, which may limit generalizability of the results to all patients with diabetes.

Pointing to studies suggesting a >50% lower risk for ASCVD in patients with diabetes who achieved multiple risk factor targets,2,3 the investigators stated that “improved multifactorial interventions focused both on lifestyle management and evidence-based therapies to achieve all targets will be necessary to optimize the prevention of future cardiovascular disease.”

How Financial Support of ACOI Is Making A Difference for Student Leaders

(This is one in a series of interviews with medical students who are strongly committed to the College and why they believe it has made a difference in their lives. This series is presented by Barbara L. Ciconte, CFRE, Development Counsel to ACOI.)

Meet Oksana Vasylivna Mayovska and Sanath Shetty, second year medical students at Rowan University School of Osteopathic Medicine in Stratford, New Jersey. They currently serve as the Co-Presidents of the Student Osteopathic Internal Medicine Club.

Oksana and her family moved to Northern New Jersey from Ukraine when she was six years old. With an interest in medicine, Oksana majored in biology and minored in public health and sociology at Drew University in New Jersey. She first heard of osteopathic medicine during her junior year. When she interviewed to attend Rowan, she knew the osteopathic, holistic approach to preserve health was where she belonged.

Sanath and his family came to the U.S. from India when he was 10 years old. After living in New York City and Georgia, his family settled in New Jersey. With an interest in the sciences and medicine, Sanath studied at Rutgers University-New Brunswick in New Jersey majoring in cell biology/neuroscience and psychology. While a student at Rutgers, he shadowed a medical student at Rowan and was drawn to the philosophy and patient-centered care that osteopathic medicine offered.

Ms. Ciconte: I know you attended the 2018 ACOI Annual Convention in Orlando. Tell me about your experiences.

Ms. Mayovska: I was fortunate to attend the 2017 ACOI Annual Convention in Washington, DC as well as the one in Orlando. It was wonderful to hear the residency directors tell us what they look for when choosing applicants for their programs firsthand. I also liked the program on student burnout that covered what medical students need to do to take care of ourselves. Dr. Good, who Sanath and I met when he did a Visiting Professor program at Rowan, truly made the students feel a part of the ACOI family at the convention.

Mr. Shetty: It was great attending my first ACOI convention. I especially liked the smaller sessions with other students from around the country. In addition, ACOI’s session about the single GME initiative was helpful, as it was probably the only lecture that I have attended that informed us about the process of the “merger” and how it impacts our osteopathic field. And as Oksana said, the doctors on the residency panel were very helpful and informative. They were also very inspiring as they spoke about their profession.

Ms. Ciconte: As the SOIMA Co-Presidents, tell me about a Visiting Professor session you had.

Ms. Mayovska and Mr. Shetty: First, we want to thank the ACOI staff for all their help in organizing our Visiting Professor sessions. They were terrific. We were able to promote our sessions so that we had great attendance. Last year, Dr. Good visited us and his session was wonderful, very interactive and gave us a realistic view of medicine in the future. He discussed the time commitment, financial burden and training involved if one were to pursue the various subspecialties. Additionally, since at this time in our medical education we are following a traditional track, it was interesting to have Dr. Good present a clinical case for us to discuss. It was very engaging for the students and I could tell they were excited by it. Dr. Marianne Holler did a Visiting Professor session more recently that focused on end-of-life matters, which is her field of expertise.

Ms. Ciconte: What are some of the challenges facing medical students today?

Ms. Mayovska: The transition to the ACGME system presents a challenge for matching medical students to residencies. We are all learning the same things so it’s fitting to be on a level playing field, so to speak, but the increased competition for residency slots will be intense. We really don’t know what is going to happen.

Mr. Shetty: I see the issue of managing Boards, studying and school work. You truly get a feel for what burnout means when you are in the thick of the second year of medical school. The ever looming question of what Boards should we take? Medical school is truly a marathon, which can be a daunting experience.

Ms. Ciconte: How can ACOI help?

Ms. Mayovska and Mr. Shetty: Our medical school is offering student wellness programs. It would be good for the ACOI to provide funds for these de-stressing efforts. We think the ACOI could also help students learn about financial management of their own funds and the business aspects of their practices.

Ms. Ciconte: Your Visiting Professor sessions and grants to student leaders to attend the Annual Convention are thanks to gifts to the College, especially to the ACOI’s Generational Advancement Fund. What would you say to encourage more ACOI members to contribute to the Fund?

Ms. Mayovska and Mr. Shetty: First, we would say thank you to them for their financial support because it is making a difference in the lives of medical students. Their support enables us to learn about osteopathic internal medicine by attending ACOI annual conventions, meeting osteopathic interns who can serve as mentors, and receiving textbook vouchers at convention. Visiting Professors who present sessions on osteopathic medical school campuses expose students to different things than medical school. They bring their knowledge and experience from different geographic areas to us. The ACOI should share photos from student internal medicine clubs with members so that they can see how well attended they are and the impact their support is having.

We look forward to a future time when we, too, can give back to the College like ACOI donors now.
75th Anniversary Campaign Honor Roll of Donors
(Outright Gifts and Multi-Year Commitments of $1,000 or more as of February 15, 2019)

The ACOI Board of Directors wishes to thank all ACOI members for their annual support for the College. The generous support of our 75th Anniversary Campaign donors is of the utmost importance as we seek to maintain an osteopathic approach to internal medicine for future generations of patients.

75th Anniversary Campaign Honor Roll of Donors
(Outright Gifts and Multi-Year Commitments of $1,000 or more as of February 15, 2019)

With the launch of the ACOI Online Learning Center, continuing medical education is now available at your fingertips 24/7.

Convenient. Affordable.
Visit www.learning.acoi.org to get started!

When you join Northwest Permanente, P.C., you will have the chance to practice in an environment that offers ample opportunity to pursue and achieve your personal and professional goals. You will benefit from a comprehensive network of support services and a talented team of colleagues who share your passion for medicine and patient care.

We invite you to consider Primary Care or Urgent Care opportunities with our physician-managed, multi-specialty group of over 1,500 physicians and clinicians who care for over 600,000 members throughout Oregon and Southwest Washington.

PRIMARY CARE and URGENT CARE PHYSICIANS

Opportunities available in Portland and Salem, OR, and SW WA, including Longview.

As one of the nation’s pre-eminent health care systems and a benchmark for comprehensive, integrated and high-quality care, we offer a variety of opportunities to grow and hone your skillset. We offer leadership, research and teaching opportunities, as well as new physician mentorship programs, cross-specialty collaboration, career growth and stability.

Our physicians enjoy:

• Competitive salary and benefit package
• Student loan assistance program
• Education stipend and leave for continued medical education
• Professional liability coverage
• Generous retirement programs

Join us and be a part of something unique, something special, something that matters.

To apply, please visit: http://nwp.kpphysiciancareers.com.

Please contact Sr. Recruiter, Marisa Walter, at Marisa.E.Walter@kp.org or 503-813-1045, with any questions. EOE

Find Your Career at CHSU

CHSU College of Osteopathic Medicine is hiring full-time and part-time positions in UME with future potential in GME.

Classes begin Summer 2020. Apply at CHSU.edu

Paper Sees Potential for Physician Compensation Bubble

ACOI member Seger S. Morris, DO, MBA, FACOI, of Corinth, MS, wrote a paper on the potential for a physician compensation “bubble” for the American Association for Physician Leadership. The paper, which was published in January, notes that physician compensation is of significant interest to both the general public and the health care community. There is public sentiment that U.S. physicians are compensated well, so actions taken by Congress made physicians an easy target for policies that have led to instability in compensation. This, and increases in administrative costs, correlated with the transition of physicians from private practice to employed models — could be leading to a compensation bubble that will burst if it isn’t addressed.

Dr. Morris is a hospitalist at Magnolia Regional Health Center in Corinth, who serves on the ACOI Committee on Government Affairs. He is also chair of the AOA Bureau of Emerging Leaders and represents new physicians in practice on the AOA Board of Trustees. Third-year internal medicine resident Heather Lusby, DO, is also an author of the paper. You can read the paper here: https://www.physicianleaders.org/news/physician-compensation-bubble-loomings.
Free 2019 Planning Guides Help Save Taxes and Help ACOI!
We are pleased to offer two helpful new planning documents: Your 2019 Personal Planning Guide has ideas and strategies on

- Estate Planning
- Gifts from Your Estate
- Income Tax Planning
- Investments and Retirement
- Social Security
- Charitable Gift Planning

An easy to understand, non-technical comparison of charitable gift techniques is included in the 2019 Federal Tax Pocket Guide which we will also send you. It’s packed with information on income tax and estates and trusts, the Federal Corporation Tax, Federal Income Tax on Capital Gains and other charts and tables you may want to review before talking with your estate planner or tax attorney. You can also give it to your legal, tax or estate planner. They will be grateful and may ask for another! Let us know and we’ll get them to you right away!

Please email katie@acoi.org and ask to receive these helpful planning booklets. If you already know that you would like to have Mr. Sandy Macnab, the ACOI planned giving consultant call you, please email Brian Donadio at bjd@acoi.org or call 301-231-8877 to let us know how and when to contact you.

Join the New Sustainers Club Today
The ACOI is pleased to welcome and recognize the following members of our new Sustainers Club:

- Lee Peter Bee, DO, FACOI
- Janet Cheek, DO, FACOI
- Jeffrey Packer, DO, FACOI
- Laura Rosch, DO, FACOI
- Christine Samsa, DO, FACOI and Nathan Samsa, DO, FACOI
- Samuel Snyder, DO, FACOI

BECOME A MEMBER OF THE NEW ACOI SUSTAINERS CLUB
Help the College Better Plan for Its Future!
Sustainer Club Members contribute on a monthly basis. Benefits of being a Sustainer Club member include:

- Invitations to donor events at ACOI meetings
- Update communications from ACOI leaders twice a year
- Special recognition as Sustainers Club members in ACOI publications and the website

Sign Up Today by clicking https://www.acoi.org/make-a-gift-to-acoi/your-support-makes-difference-acoi and check the monthly gift box to make a credit card contribution.

Remember, your gift is tax-deductible to the full extent allowed by law.

Trainers Congress Registration Is Open!
Register today for the 2019 ACOI Congress on Medical Education for Resident Trainers scheduled for May 10-11, 2019 at the Baltimore Marriott Waterfront Hotel in Baltimore, MD. This year’s Congress will focus heavily on faculty development to assist you in the new single GME milieu.

The agenda will include presentations on meeting scholarly activity requirements; preparing residents for the yearly ACGME survey; how to respond to ACGME citations; utilizing a flipped classroom in a residency program; utilizing best practices in osteopathic recognition; training MD residents who want OPP/OMM; recognizing unconscious biases; providing effective feeback. Finally, ACGME Internal Medicine Review Committee leaders will offer their insights into recent Review Committee activities.

For travel purposes, the meeting will start on Friday, May 10th at 8:00 am and conclude on Saturday, May 11th, early in the afternoon.
Advanced CME Course for Cardiologists Planned for May

Exploring New Science in Cardiovascular Medicine, ACOI’s continuing education program for cardiologists, will take place May 9-12, 2019 at the Baltimore Marriott Waterfront Hotel. An internationally recognized faculty will bring the very latest evidence-based advances using a highly interactive, case-centric approach. This activity is part of a series of new CME offerings the ACOI has created for subspecialists. It is designed for general cardiologists, interventional cardiologists and electrophysiologists in clinical practice. This activity is certified for both AOA Category 1A CME Credit and for AMA PRA Category 1 Credit™.

Cardiologists are faced with a wide range of clinical presentations and must remain current with the most recent guidelines, pivotal trials and real-world evidence across multiple areas of cardiovascular risk and disease. Clinical cardiologists, including general cardiologists, interventionalists and electrophysiologists, are challenged to maintain knowledge of, and competence in, all relevant medical advances and structural initiatives related to the myriad of cases with which they are involved. This conference will address key gaps in knowledge and competence determined through literature reviews, population health data and quality measurement sources (e.g., AHRQ, NCQA), and ongoing survey activities within ACOI. Gaps were also identified through audits of sources such as the United Health Foundation, CDC, WHO, etc.

Data from our needs assessment process reveal that while most cardiologists are aware of best-practice approaches to the care of various CV diseases, these approaches are not consistently implemented. Some particular areas to be highlighted in this activity include the utility of biomarkers and left ventricular assistive devices in the management of heart failure; optimizing the cardiologist’s role in the emergency department; atypical electrophysiologic findings, and adult congenital heart disease for the cardiologist.

At the completion of this program, attendees will be able to:

• Define the clinical value of biomarkers in the DX and TX of heart failure.
• Discuss the optimal uses of LVAD technology for HF.
• Identify how advanced imaging techniques can improve early intervention in the ED and outcomes.
• Establish a patient-centered approach to left atrial appendage occlusion vs. anticoagulant therapies.
• Discuss and evaluate the rationale behind the latest guidelines for hypertension in patients with T2DM.
• Apply case-derived insights to the use of anticoagulants.

Complete registration and agenda information appear elsewhere in this newsletter and at www.acoi.org.
May 9-12, 2019 in Baltimore

Hospital Medicine Program Addresses Practice Gaps in Key Areas

Clinical Challenges in Hospital Medicine, the popular ACOI CME program for hospitalists and others who treat patients in the hospital, will take place May 9-12 in Baltimore. Hospital-based internists have very busy practices and it is impossible for them to keep updated on all the medical advances and structural initiatives related to the myriad of clinical cases presented to them. This conference will address key gaps that have been found to exist in hospital-based internists’ practices. These gaps were determined through literature reviews, population health data reported by the CDC and quality measurement sources (e.g., AHRQ, NCQA), and ongoing survey activities within ACOI.

While most hospitalists maintain a wide breadth of awareness of best practices in many areas, maintaining knowledge and skills in all, and certainly the most difficult clinical areas, creates a unique challenge.

ACOI’s assessment using the latest guidelines, epidemiologic data and survey reports shows that hospitalists need more clarity on how best to manage acute and chronic pain under current changes in policies. Successfully meeting QI mandates is another challenge. In addition, conflicting guidelines based on special populations (e.g., hypertension in geriatric patients and triose with T2DM) leaves the treater with the need for more specific guidance. Heart failure and sleep apnea are two other areas where clearer evidence will impact physician competence and improve outcomes.

Learning Objectives--At the completion of this program, participants will be able to:
• Articulate the latest evidence-based approaches to the prevention and management of sepsis.
• Delineate the classifications of Diastolic Heart Failure and different treatment options.
• Describe the most recent developments in medically-assisted opioid management.
• Develop strategies to prevent the misinterpretation of lab values.
• Identify the optimal approaches for managing adult patients with congenital heart failure.

Outcomes - This activity will provide internists and subspecialists updates in the areas of healthcare administration, cardiology, pulmonary, critical care medicine, infectious diseases, gastroenterology, hematology/oncology, internal medicine, etc., empowering them to provide improved care to their patients. Outcomes will be assessed via immediate and time-delayed post-tests assessing intent to change practice behavior, and self-report of changes.

The 2019 Hospital Medicine Program will take place at the Baltimore Marriott Waterfront Hotel. Complete registration and hotel information is available at www.acoi.org.

This activity is certified for both AOA Category 1A CME Credit and for AMA PRA Category 1 Credit™.

Add Your Name to Leave a Legacy

Members of the ACOI Legacy Society have done their part to ensure the future of the College. A special thank you to our Charter Members!

If you are not a member, please look at the names listed and consider adding yours to those who have made a provision in their estate plans, typically with a bequest provision, that will provide support in the future.

It will bring you peace of mind knowing that you have done your part to ensure that those who enter the profession in the future will have access to the same education, support, and mentoring that you have received. Think of it as paying your dues forward, leaving a legacy and mentoring those you will never know, but who will provide future generations with the kind of patient-centered care that you have built a career providing.

New members will be recognized at the 2019 ACOI Convention in Phoenix. Be among those who will receive a certificate and a unique crystal memento that shows that you have proudly made an investment in the future of the profession.

If you would like to have the ACOI planned giving consultant talk with you about creative ways you can join the Legacy Society now and receive a lifetime income, please contact Brian Donadio via email at bjd@acoi.org, or call 301-231-8877 to let us know how and when to contact you.

Legacy Society Charter Members

Dr. Jack and Jocelyn Bragg
Dr. John and Dr. Michelle Bulger
Dr. Mathew and Marbree Hardee
Dr. David and Rita Hitzeman
Dr. Robert and Donna Juhasz

Dr. Frederick and Amy Schaller
American College of Osteopathic Internists
INTERNAL MEDICINE BOARD REVIEW COURSE
Marriott Baltimore Waterfront Hotel • May 8-12, 2019

Course Description and Learning Objectives
This 5-day course will provide an intensive and comprehensive overview of most of the major areas of importance to physicians preparing for the American Osteopathic Board of Internal Medicine Certifying Examination and Recertifying Examination (September 3-5, 2019). It will also provide a thorough overview of major areas of internal medicine. Special emphasis will be placed on recent advances in various subspecialty areas in internal medicine and clinical skills management as they pertain to clinical practice and the examinations.

Several “Board-type” questions will be included during each lecture to improve registrants’ readiness to respond to examination questions. The lectures will be given by distinguished faculty who are recognized for their ability as outstanding teachers and clinicians. A detailed syllabus will be provided to registrants. Immediately following each day’s lectures, designated faculty from each subspecialty area will be available for a question and answer period.

GENERAL INFORMATION
Recommended Audience
This postgraduate course is appropriate for physicians who provide personal care to adults: general internists; family physicians; residents and fellows-in-training; and subspecialists who want to remain current in the field of internal medicine.

Course Location
The Baltimore Marriott Waterfront Hotel is located at 700 Aliceanna Street, Baltimore, MD 21202. For hotel information, call 1-877-212-5752. A special room rate of $199/per night (plus 15.5% tax) has been arranged for this meeting. Reservations must be made by April 16, 2019 in order to receive this special ACOI discounted room rate. Reservations may be made online at https://book.passkey.com/go/ACOIJointReview2019.

Course Directors
Kevin P. Hubbard, DO, MACOI and Scott L. Spradlin, DO, FACOI.

Syllabus
The syllabus included with registration is provided electronically (you will need a lap top or tablet to follow the agenda on site) and includes the following material: Expanded narrative/lecture content, including all information the instructors deem vital to board preparation; replication of key slides; a bibliography of key references and suggested readings; and board-type questions directly relating to each presentation as an aid in board exam preparation. Those who prefer a printed binder may order one for an additional $80.

Early Registration
Register early to ensure a place in this course and to qualify for the early registration discount, which expires on April 16, 2019.

Discounted Fees For Residents
Residents and students receive a $100 discount off the regular registration fees.

Refunds
A processing fee of $100 will be charged for cancellations received at any time. Cancellations must be received in writing no later than April 16, 2019 in order to obtain a refund. Fees for registrations cancelled after that date will be applied toward a future ACOI meeting registration, minus the $100 processing fee.

Accreditation and Credit Designation Statements
The American College of Osteopathic Internists (ACOI) is accredited by the American Osteopathic Association to provide continuing medical education to physicians and has designated this live CME activity for a maximum of 40.75 AOA Category 1A credit.

The American College of Osteopathic Internists is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to provide continuing medical education for physicians.

The American College of Osteopathic Internists designates this live activity for a maximum of 40.75 AMA PRA Category 1 Credits™.

Physicians should claim only the credit commensurate with the extent of their participation in the activity.

Disclaimer
Participants should be aware that the certifying and recertifying examinations in internal medicine are prepared by the American Osteopathic Board of Internal Medicine, an organization independent from the American College of Osteopathic Internists. Although the general areas of content have been announced, the questions on the examinations are confidential and have NOT been made available to any organizations, societies or schools preparing “board review courses.” Physicians considering taking such a course should realize that as a result of this confidentiality, the courses cannot be uniform and cannot purport to anticipate the examinations’ actual content.

Official Car Rental
The following discount fares arranged with Hertz are good for May 1-19, 2019. Call 800 654-2240 and refer to CV#04130013.

Send this form & payment to: ACOI, 11400 Rockville Pike, #801, Rockville, MD 20852 or Fax to 301 231-6099, or register at www.acoi.org.

NOTE: All registrations must be accompanied by a check for payment in full or appropriate credit card information. A processing fee of $100 will be charged for cancellations received at any time. In order to obtain a refund, written cancellations must be received by April 16, 2019. No refunds will be made after that date, but registration fees (less $100 cancellation fee) may be applied to a future ACOI meeting registration.

*The ACOI Generational Advancement Fund* was created to foster the growth and assure the future of osteopathic internal medicine. The Fund directs its efforts toward assisting students, residents and fellows as they begin their careers as osteopathic internists. For more information, visit [https://www.acoi.org/mms/donation_form.cgi](https://www.acoi.org/mms/donation_form.cgi)

☐ PLEASE NOTE: Check here if you plan to stay at the Baltimore Marriott Waterfront Hotel. Separate hotel registration is required. This does not register or guarantee a room at the hotel.

☐ SPECIAL NEEDS: In accordance with the Americans with Disabilities Act, every effort has been made to make this conference and activities accessible to people of all capabilities. Please list specific special assistance needed or any dietary restrictions, or contact Susan Stacy at susan@acoi.org or by phone, 301 231-8877.

List special requirements here: ____________________________________________________________
# ACOI 2019 CLINICAL CHALLENGES IN HOSPITAL MEDICINE
## Preliminary Agenda

### THURSDAY, MAY 9
- **7:30- 8:00 am** Continental Breakfast
- **8:00- 8:05 am** Welcome - *Rick A. Greco, DO, FACOI*
- **8:05- 8:50 am** Potpourri of Guidelines We are Not Following - *Amanda Hayes, DO*
- **9:35 - 9:50 am** Dementia and Delirium - *Roberta S. Rose, DO*
- **8:05- 8:50 am** Blood Utilization (Will get better title) - *Amanda Hayes, DO*
- **9:50 - 10:50 am** Blood Utilization (Will get better title) - *Amanda Hayes, DO*
- **10:50 - 11:00 am** LUNCH (on your own)
- **11:00 am - 12:00 noon** Q&A
- **12:00 noon - 1:00 pm** Treating the Parkinson Patient in the Hospital - *Robert S. Rose, DO*
- **2:00 - 2:45 pm** MIPS
- **2:45 - 3:00 pm** BREAK
- **3:00 - 4:15 pm** Quality Improvement - *John B. Bulger, DO, FACOI*
- **5:15 - 5:30 pm** Q&A
- **6:00 - 7:15 pm** Welcome Reception

### FRIDAY, MAY 10
- **7:30 - 8:00 am** Continental Breakfast
- **8:00 - 8:45 am** Sepsis Guidelines: What's New? - *Mark Alain Dery, DO, FACOI*
- **8:45 - 9:45 am** TB: Acute and Latent - *Kenneth Woods, DO*
- **9:45 - 10:00 am** BREAK
- **10:00 - 11:00 am** Introduction to MAT: Removing the Stigma - *James H. Berry, DO*
- **11:00 - 11:55 am** Issues Pertaining to MAT: Addiction in the Hospital - *Patrick Marshalek, MD*
- **11:55 am - 12:00 noon** Q&A
- **12:00 noon - 1:00 pm** LUNCH (on your own)
- **1:00 - 2:00 pm** Medical Marijuana: What You Need to Know - *C. Clark Milton, DO, FACOI (invited)*
- **2:00 - 3:00 pm** In the Mind of the Triage Hospitalist - *Christian Greco, DO*
- **3:00 - 3:15 pm** BREAK
- **3:15 - 5:15 pm** Curbside Consultations - *Gerald W. Blackburn, DO, MACOI*
- **5:15 - 5:30 pm** Q&A

### SATURDAY, MAY 11
- **7:30 - 8:00 am** Continental Breakfast
- **8:00 - 9:00 am** Sleep Apnea – What’s New? - *Carol E. Ash, DO, FACOI (invited)*
- **9:00 - 10:00 am** Peer to Peer Conversations: Pitfalls and Hot Buttons
- **10:00 - 10:15 am** BREAK
- **10:15 - 11:00 am** Pulmonary Hypertension Update - *Carol E. Ash, DO, FACOI (invited)*
- **11:00 am - 12:00 noon** Tele-Medicine: Billing and Opportunities - *Amy M. Meister, DO (invited)*
- **12:00 noon - 1:00 pm** LUNCH
- **1:00 - 2:00 pm** Why Are My Patients Bleeding? Indications of Cardiac Anticoagulation - *Robert J. Fanning, DO*  
- **2:00 - 3:00 pm** Diastolic Heart Failure or HFpEF
- **3:00 - 3:15 pm** BREAK
- **3:15 - 4:00 pm** Heart Failure Guideline Updates
- **4:00 - 5:00 pm** Adult Survivors of Congenital Heart Failure - *Saurabh Rajpal, MD*
- **5:00 - 5:15 pm** Q&A

### SUNDAY, MAY 12
- **7:30 - 8:00 am** Continental Breakfast
- **8:00 - 9:00 am** Managing Post - Acute Care
- **9:00 - 10:00 am** Thoracic Somatic Dysfunction
- **10:00 - 10:15 am** BREAK
- **10:15 - 11:00 am** Consult in Maternity
- **11:00 - 11:45 am** OMM - Hospital-Based Research
- **11:45 am - 12:00 Noon** Q&A
- **12:00 Noon** Closing of Agenda - *Rick A. Greco, DO, FACOI*
A Message for Residency and Fellowship Program Directors

As you advance or maintain your accreditation status with ACGME, ACOI wants to remind you of the critical importance of internal medicine programs achieving Osteopathic Recognition (OR) with ACGME. Programs that achieve OR ensure that the unique principles and practices of the osteopathic medical profession will continue to benefit the entire community of medicine and, most importantly, our patients.

**Why should my program apply for Osteopathic Recognition?**
- Students want osteopathically-focused training.
- GME programs want the most qualified applicants.
- Hospitals want trainees who provide patient-centered care.

**How does Osteopathic Recognition address these needs?**
1. Improves **patient care** and reduces **institutional costs**.
   - Improved patient-physician communication (e.g., empathic, holistic).
   - **Reduction of pain** and discomfort, and **improvement of function** (OMT as criteria for non-pharmacologic pain control – Joint Commission).
   - Explore **alternatives to prescribing medications**.
   - Decreased length of hospital stays (e.g., surgery, pneumonia).
   - **Reduced costs**.
   - Oriented towards “team approach,” which aligns with the “medical home” concept and provides optimal care.

2. Allows physicians and the profession to maintain their **osteopathic distinctiveness**.
   - The existence of osteopathic training programs is the assurance that the profession will continue to grow and thrive.
   - (e.g., OMM, OPP, OM/ileus, Holistic Care, Communication)
   - **70% of 3rd year** osteopathic medical students (OMS) want an osteopathic focused residency program.
   - Osteopathic principles and practices can be incorporated into all specialties (e.g., cardiology, pulmonology, GI, etc.)

3. Maintains and potentially increases the **number of applicants** while continuing to attract **quality applicants**.
   - Osteopathic students represent **25% of the medical student population**
   - **70% of 3rd year** OMS want an osteopathic focused residency program
   - An OR program will attract osteopathic and allopathic students, thus **increasing the pool** of qualified applicants.

**What should you do next? And how can ACOI help?**
If you have not started your application for Osteopathic Recognition, **start it today**!
- Much of the information needed for the OR application is the same as the ACGME internal medicine application.
  - Utilize and easily transfer information incorporated in your successful ACGME initial application.
- **Assistance is available to you AT NO COST**
  - ACOI will assist you with your application.
    - Tools and sample evaluation forms.
    - Strategies to address application questions.
  - Free consultation and review services provided by ACOI.
  - For assistance, call (301) 231-8877 or email Don Nelinson ([don@acoi.org](mailto:don@acoi.org)).
