From President Carron
Hot Enough For You?

Hot weather---more than 100 degrees in Detroit tomorrow.
Hot politics--- what is happening in Washington?
AOA Hot Topics --- New CEO, new CME guidelines, Board exam debates, etc.
Hot Docs--- Are you burning up or burning out?
All the while, things heating up at the ACOI.
The ACOI Board has worked diligently over the last five years to define the ACOI’s future in the Osteopathic profession after 2020, when the College will lose its direct role in overseeing GME for Internal Medicine.

Hot Mess!
Our initial focus was to help IM residency programs achieve ACGME accreditation and gain Osteopathic Recognition. Thanks to the efforts of ACOI’s chief scientific officer,

Elections Set for November 3
Nominations Set for ACOI Leadership Positions Announced
The ACOI Nominating Committee has announced the slate of candidates for election at the Annual Meeting of Members scheduled for Sunday, November 3 in Phoenix, AZ. The Committee has nominated, Michael A. Adornetto, DO, MBA, for President-elect and Robert L. DiGiovanni, DO, for Secretary-Treasurer. The Nominating Committee also approved four candidates for election to the Board of Directors. Incumbents Susan M. Enright, DO, Robert T. Hasty, DO, and C. Clark Milton, DO, were nominated to new terms. Watson Ducatel, DO, MPH, was nominated to complete the one year remaining in the term previously filled by Dr. DiGiovanni. Under the College’s Bylaws, this year’s President-elect, Samuel K. Snyder, DO, will be inaugurated as President for the 2019-2020 year at the conclusion of the elections.

Michael A. Adornetto, DO, MBA, FACOI, is board-certified in internal medicine and pediatrics with a private practice in Westlake, Ohio. A graduate of the Ohio University College of Osteopathic Medicine, Dr. Adornetto completed a combined internal medicine/pediatrics residency at the Cleveland Clinic Foundation in 1994. He is president of the West Shore Primary Care Associates and was the founding program director of the osteopathic internal medicine residency at St. John Medical Center, Westlake. Dr. Adornetto is chair of the ACOI Practice Management and Professional Development Committee, and also serves on the Executive Committee. He is chairing the 2019 Convention program.

Renew Your Membership and Receive a $50 Education Credit!
The new ACOI membership year began on July 1 and renewal information has been sent to all members. This year, every new or renewing member of the College will receive a $50 credit good toward the purchase of a CME activity of your choice at the ACOI Online Learning Center. This one-time credit can be used any time through June 30 of 2020.

2019 Convention Registration Open

Letter from the President
continued from page 1

Don Nelinson, PhD, and our Council on Education and Evaluation, virtually all the programs are accredited, and many have obtained Osteopathic Recognition. ACOI will continue to have an impact on these residents.

Hot diggerty dog!

Next, ACOI developed an online learning management system with the guidance of ACOI Deputy Executive Director, Tim McNichol. SIGN UP NOW! We have something for everyone online – primary care, subspecialists, office, hospital and even how to improve your lecture skills. Much, Much More is to come, including some “meet the professor” 15-minute sessions for residents/students. Learn from home or even your phone while waiting in line at grocery store!

Hot off the presses!

CME will continue to be a major focus of our future. You have heard already ACOI has obtained ACCME accreditation, again with the help of Dr. Nelinson. As we move forward, most ACOI education activities will provide both AOA and AMA PRA credit. We welcome MD Active members and have our first one, Christian Cable, immediate past chair of the internal medicine residency review committee for the ACGME. Invite your MD friends to our next meeting. The CME Committee is working continuously to upgrade and improve our meeting content. Under the guidance of Brian Donadio and Susan Stacy – the ACOI annual convention will continue to be “a coming home” for you with lots of take home info!

Hot Stuff!

We have surveyed our members and WE HEAR YOU! Many of you have expressed frustration with your job, hours, lack of time with family, or simply lack of control of your time. We have developed Principle-Centered Medicine, thanks mostly to ACOI Board member Bob Cain, DO, as guiding principles for our future and to help you stay true to why you pursued medicine.

The principles are as follows:

1. Focus on health and well-being;
2. Create meaningful and pervasive relationships;
3. Practice deep listening;
4. Embrace wholeness;
5. Recognize the health potential within us;
6. Address complexity;
7. Find and maintain balance.

With a focus on education, leadership, community, and health and wellness, ACOI will help you remember “It’s always been within you.”

Hot Damn!
Circuit Court Hears Oral Arguments in ACA Case
The Affordable Care Act (ACA) continues to work its way through the courts. Most recently, the Fifth Circuit Court heard oral arguments in a lower court decision (Texas v. United States) finding no part of the ACA could stand following enactment of legislation zeroing out the individual mandate penalty created under the ACA. As previously reported, the US District Court for the Northern District of Texas found that the Supreme Court decision upholding the ACA was no longer applicable due to a change in federal law. The prior Supreme Court decision found that the ACA was constitutional on the grounds that creation of the individual mandate was within Congress’ taxing authority. If the Fifth Circuit Court affirms the lower court decision, the ACA could be struck down in its entirety. The case was brought by 18 Republican-led states. It is likely this case will be considered by the Supreme Court for final adjudication. The ACOI will follow the case closely due to its potential impact on physicians and patients. To date, Congress has failed to take any actions in preparation for the potentially far-reaching impact of this court case.

Administration Launches Kidney Health Initiative
President Trump recently issued an Executive Order (EO) establishing the Advancing American Kidney Health Initiative to improve care for those suffering from kidney disease in the United States. The initiative’s goals are as follow: reduce the number of patients who develop kidney failure; reduce the number of Americans who receive dialysis in dialysis centers; and, increase the number of kidneys available for transplant. Concurrent with the issuance of the EO, the Centers for Medicare and Medicaid Services (CMS) proposed a mandatory End-Stage Renal Disease Treatment payment model to promote in-home dialysis and increase the number of available kidney transplants, among other things. You can learn more by visiting https://www.cms.gov/newsroom/press-releases/hhs-transform-care-delivery-patients-chronic-kidney-disease.

House and Senate Advance Efforts to Address Surprise Medical Bills
The House and Senate continue to consider legislation crafted to protect patients from surprise medical bills. Surprise medical billing most often occurs when a patient receives services from an out-of-network provider in an in-network facility. Multiple committees of jurisdiction in the House and Senate have considered, or are considering, legislation addressing the matter. While there is bipartisan support to address surprise medical billing, it has been difficult for legislators to find agreement on how best to resolve payment disputes that arise between providers and insurers. The ACOI joined with more than 100 physician organizations in sending a letter to the leadership of the House Committee on Energy and Commerce expressing support for the creation of an independent dispute resolution process that is fair to both physicians and patients. You can read the letter at https://www.acoi.org/advocacy/legislative-and-regulatory-comments.

Listing of Drug Prices in Direct-to-Consumer Advertising Halted
A federal court recently ruled CMS’s final rule requiring pharmaceutical manufacturers to include a drug’s list price in direct-to-consumer television advertisements cannot take effect. In vacating the final rule, the US District Court for the District of Columbia found the Department of Health and Human Services (HHS) overstepped its authority to regulate the marketing of prescription drugs as part of its role in administering the Medicare and Medicaid programs. The court expressed concern with the final rule’s impact on pharmaceutical companies that are not direct participants in Medicare and Medicaid. The court suggested that such actions might more appropriately fall under the jurisdiction of the Food and Drug Administration. To date, there has been no indication that the court decision will be appealed.

More Than $9 Billion in Payments Reported
CMS recently released a report showing $9.35 billion in payments made between drug and medical device makers and physicians and teaching hospitals in 2018. This amount is up from the $8.97 billion in financial transactions reported in 2017. According to the report, there were 11.9 million records of payments from manufacturers to 627,000 physicians and 1,180 teaching hospitals. Of the total payments reported, $4.93 billion were research-related payments. The Physician Payment Sunshine Act, which created the Open Payments Program, was enacted as part of the ACA.

CMS Finalizes Policy to Cover Ambulatory Blood Pressure Monitoring
CMS recently released a decision memorandum expanding coverage of Ambulatory Blood Pressure Monitoring (ABPM) to patients with suspected “white coat hypertension” (WCH). WCH is defined as office blood pressure > 140/90
Greetings colleagues and welcome to the July issue of Talking Science and Education. As we move into a sultry summer, I thought I’d share with you a picture of my neighbors who came by while I was writing last month’s column.

Last month’s quiz question featured a major population health challenge. We asked by what percent has adult obesity increased in the past year.

Obesity prevalence exceeds 30 percent of the adult population for the first time in America’s Health Rankings Annual Report history. In the past year, obesity increased from 29.9 percent to 31.3 percent of adults.

This month we ask about the number of primary care physicians per 100,000 population. In the past year, by what percent did primary care physicians increase per 100,000 population?

A. 2%
B. 5%
C. 10%
D. 12%

Talking Education
Communicating for Concordance and Adherence: Education is but one element!

There is a general belief that patient educational interventions for enhancing medication adherence are important. However, their success at improving adherence is debatable1. A major misassumption involved in the clinical and educational approaches to adherence and concordance is that, “If we just give them enough knowledge, they will adhere!” They, of course, are the patients. But in comes that sneaky little word concordance: the engagement in a dialogue to optimize buy-in and agreement to implement a treatment plan. Many clinicians balk: “I don’t have time!” Yet treatment failures resulting from non-adherence are estimated to top $100,000,000/year in the US.

So, communicating for adherence goes beyond “education.” We must be willing to engage our patients as important partners and decision-makers in their own healthcare. Adherence, concordance, empowerment, and self-management; these are goals that will make our patients more capable and competent to actively engage in their self-care2.

Diabetes Dialogues
Better medication access needed to address glycemic management disparities across income levels

Canadian adults with diabetes who have the lowest incomes have higher HbA1c levels compared with those with the highest incomes, but researchers argue that universal prescription access can lessen the discrepancy.

Although all residents have access to universal insurance for hospital and physician services, residents of most provinces lack universal, publicly-funded drug insurance before the age of 65, and instead either rely on private insurance plans through their employer, or must pay for medications out-of-pocket.

Bashu Shah and colleagues at the University of Toronto reviewed HbA1c levels during the first half of 2015 from 583,884 adults with diabetes who had data in the Ontario Diabetes Database. Participants younger than 40 years and older than 89 years were excluded; information on median neighborhood income was collected from Statistics Canada and used to stratify the participants into five income-level groups (lowest-income group: mean age, 64.9 years; 50.4% women; highest-income group: mean age, 66.2 years; 41.7% women).

According to the researchers, participants with the lowest income averaged higher HbA1c levels (56 mmol/mol, or 7.3%) vs. those with the highest income (54 mmol/mol, or 7.1%; P < .001). Among all income levels, those aged at least 65 years had superior glycemic control (53 mmol/mol, or 7%) compared with those younger than 65 (57 mmol/mol, or 7.4%; P < .001). The researchers added that age was a statistically significant modifier of the effect of income, with a wider gap in average HbA1c measures between income levels for those younger than 65 years vs. those aged at least 65 years.

Their findings highlight that lower-income populations with diabetes in Canada have poorer glycemic control compared to their higher-income counterparts, despite access to publicly funded health care. Health policy solutions to bridge this gap are likely to be multidimensional, but based on the results of the present study might include broadening drug insurance coverage to those younger than 65 to reduce health inequalities and the burden of diabetes in society3.

One may be able to extend these findings to the US where the skyrocketing costs for antihyperglycemic agents, including insulin, have become prohibitive.

Contributions Support ACOI’s Visiting Professor Programs

Thanks to ACOI members who make a gift to the College’s Generational Advancement Fund, we are able to support and grow our visits to medical school campuses across the country. Our thanks to our Visiting Professors for taking the time to educate medical students about osteopathic internal medicine. Twenty-two Visiting Professor sessions were conducted during the 2018-2019 training year.

AOBIM Adds Advanced Heart Failure/Transplant Certification

The AOA/AOBIM has announced a new certification opportunity in Advanced Heart Failure and Transplant Cardiology. This AOBIM certification will recognize the distinct and critical knowledge, skills, abilities, and judgements that practicing physicians require in the Advanced Heart Failure and Transplant Cardiology specialty. Applicants must be AOBIM board-certified specialists in Cardiology. Eligible applicants must have completed three years of an ACGME- or AOA-recognized fellowship program in Cardiology, followed by a one year ACGME- or AOA-recognized fellowship program in Advanced Heart Failure and Transplant Cardiology. For the first three years/three examinations (2019, 2020, and 2021), cardiologists certified by AOBIM who have not completed formal training in advanced heart failure and transplant cardiology will be eligible to apply for the Certification Examination in Advanced Heart Failure and Transplant Cardiology via the practice pathway. Please visit the AOBIM website for more information regarding the practice pathway criteria.

Exam application deadlines:

First Deadline: Friday, September 13, 2019

Final Deadline: Sunday, October 13, 2019

Exam administration dates (at Pearson Vue testing centers):

November 13-15, 2019

The AOBIM is grateful for all the subject matter experts who worked on the development of this exam and certification. For more information regarding this exam and to apply, visit the AOBIM – Advanced Heart Failure and Transplant Cardiology web page. Please contact the AOBIM at aobim@osteopathic.org or (312) 202-8274 for any further questions or comments regarding this exam or certification.

ACOI Welcomes New Planned Giving Counsel

Barbara L. Tesner, CFRE is now working with Barbara L. Ciconte, ACOI’s Development Counsel, to provide education and information to ACOI members about the various ways they can support the College and provide for their families at the same time. The ACOI wishes to thank Sandy Macnab, CFRE, for his many years of service to the College in this area.

A senior fundraising consultant with thirty-years of experience, Barbara specializes in major gifts, planned gifts, and donor engagement. She and Barbara Ciconte have collaborated on other Washington, DC area clients which resulted in great success for those organizations.

You can meet her at the 2019 ACOI Annual Convention in Phoenix, where she will be presenting a Sunrise Session on planned giving.
The 75th Anniversary Campaign Honor Roll of Donors
(Outright Gifts and Multi-Year Commitments of $1,000 or more as of July 15, 2019)

The ACOI Board of Directors wishes to thank all ACOI members for their annual support for the College. The generous support of our 75th Anniversary Campaign donors is of the utmost importance as we seek to maintain an osteopathic approach to internal medicine for future generations of patients.

Join the New Sustainers Club Today
The ACOI’s Sustainers Club is growing! The College is pleased to welcome and recognize the following members of our new Sustainers Club:

Lee Peter Bee, DO, FACOI
Robert A. Cain, DO, FACOI
Janet Cheek, DO, FACOI
David J. Mohlman, DO, FACOI
Jeffrey Packer, DO, FACOI
Laura Rosch, DO, FACOI
Christine and Nathan Samsa, DOs, FACOIs
Samuel Snyder, DO, FACOI

BECOME A MEMBER OF THE NEW ACOI SUSTAINERS CLUB
Help the College Better Plan for Its Future!
Sustainer Club Members contribute on a monthly basis. Benefits of being a Sustainer Club member include:
• Invitations to donor events at ACOI meetings
• Update communications from ACOI leaders twice a year
• Special recognition as Sustainers Club members in ACOI publications and the website

Sign Up Today by clicking https://www.acoi.org/make-a-gift-to-acoi/your-support-makes-difference-acoi
and check the monthly gift box to make a credit card contribution.

Remember, your gift is tax-deductible to the full extent allowed by law.
Add Your Name to Leave a Legacy

Members of the ACOI Legacy Society have done their part to ensure the future of the College. A special thank you to our Charter Members!

If you are not a member, please look at the names listed and consider adding yours to those who have made a provision in their estate plans, typically with a bequest provision, that will provide support in the future.

It will bring you peace of mind knowing that you have done your part to ensure that those who enter the profession in the future will have access to the same education, support, and mentoring that you have received. Think of it as paying your dues forward with a bequest of $10,000 or more, leaving a legacy and mentoring those you will never know, but who will provide future generations with the kind of principle-centered care that you have built a career providing.

New members will be recognized at the 2019 ACOI Convention in Phoenix. Be among those who will receive a certificate and a unique crystal memento that shows that you have proudly made an investment in the future of the profession.

If you would like to have the ACOI planned giving consultant talk with you about creative ways you can join the Legacy Society now and receive a lifetime income, please contact Brian Donadio via email at bjd@acoi.org or call 301-231-8877 to let us know how and when to contact you.

Legacy Society Charter Members

Dr. Jack and Jocelyn Bragg
Dr. John and Dr. Michelle Bulger
Dr. Mathew and Marbree Hardee
Dr. David and Rita Hitzeman
Dr. Robert and Donna Juhasz
Dr. Karen and Jim Nichols
Dr. Eugene and Elena Oliveri
Dr. Frederick and Amy Schaller

75th Anniversary Fundraising Campaign

How Your Contributions Have Been Put to Use

The ACOI has used the funds raised in the successful 75th Anniversary Campaign to create a home for those who believe in the patient-centered, osteopathic approach to healthcare that we call Principle-Centered Medicine. More information about this will be forthcoming soon.

Meanwhile, in the past three years, we have hired staff and accomplished the following:

• Achieved accreditation from the Accreditation Council for Continuing Medical Education (ACCME) as a CME provider. Our CME now can provide AOA and AMA credit and meets the recertification requirements of both the AOBIM and the ABIM.

• Upgraded our technology to allow ACOI to offer CME in a variety of new, mobile-friendly formats that our members need. The new ACOI Online Learning Center now houses more than 100 CME credit opportunities that can be accessed anywhere, anytime.

• Provided hands-on assistance to residency programs as they seek allopathic accreditation while encouraging them to secure Osteopathic Recognition as they make the transition. This assures that the distinctive osteopathic philosophy imbued in students during their medical school years will continue during residency. The overwhelming majority of both internal medicine and subspecialty programs have been approved by the ACGME.

• Became the first osteopathic specialty to be granted an ex officio seat on an ACGME Residency Review Committee.
Robert L. DiGiovanni, DO, FACOI is a board-certified internist and rheumatologist practicing in Largo, FL. He completed his internal medicine training at Suncoast Hospital (now Largo Medical Center) and a fellowship in rheumatology at the University of Arizona Health Sciences Center in Tucson. He is the current president of Suncoast Internal Medicine Consultants and the program director of the rheumatology fellowship program at Largo Medical Center. Dr. DiGiovanni has been active in the ACOI Subspecialty Section of Rheumatology, serving as chairman and education coordinator of the section. He chaired the 2018 Annual Convention program and has provided numerous lectures for the College at the board review course, convention and other meetings. Dr. DiGiovanni has been an Active member of the ACOI since 1987 and achieved the degree of Fellow in 1994. He was first elected to the Board of Directors in 2013.

Watson Ducatel, DO, MPH, FACOI is a board-certified general internist practicing in Brandon, FL. A 2011 graduate of NOVA Southeastern College of Osteopathic Medicine (now the Kiran L. Patel College of Osteopathic Medicine), he received his Master of Public Health at the same institution in 2011. Dr. Ducatel completed his internal medicine residency at Largo, FL Medical Center in 2014. He has served on the ACOI Committee on Minority Health and Cultural Competency since 2016 and chaired a symposium on the impact of violence on underserved populations at the 2018 ACOI Convention. Dr. Ducatel has been an ACOI Active member since completing his training and received the degree of Fellow in 2016.

Susan M. Enright, DO, FACOI of Rochester Hills, MI, is board certified in internal medicine and emergency medicine. She serves at Michigan State University College of Osteopathic Medicine as director of the clinical clerkship curriculum. She has served several terms on the ACOI Council on Education and Evaluation, including the past four years as Chair. She also chairs the AOA’s Program and Trainee Review Council (PTRC). Dr. Enright has been an ACOI Active member since 1998 and earned the degree of Fellow in 2002. Her first term on the Board began in 2016.

Robert T. Hasty, DO, FACOI is the founding dean of the new college of osteopathic medicine at the Kansas Health Science Center (KHSC). He assumed that role after opening the Idaho College of Osteopathic Medicine, where he was founding dean and chief academic officer from 2015 until May of this year. Dr. Hasty is a graduate of the Nova Southeastern University College of Osteopathic Medicine (now Kiran C. Patel College of Osteopathic Medicine) and completed his internal medicine residency at Mount Sinai Medical Center in Miami, FL. Dr. Hasty completed an AOA Health Policy Fellowship in 2006-07. He has served on the ACOI CME Committee and the Council on Education and Evaluation. He chaired or co-chaired the program at the Annual Trainers’ Congress. He is active with several professional organizations, including the National Board of Osteopathic Medical Examiners. Dr. Hasty was appointed in 2105 as a member of the ACGME Osteopathic Principles Committee. He has been an Active member of the College since 2004 and received his ACOI Fellowship in 2007. He was named ACOI Teacher of the Year in 2014. Dr. Hasty was first elected to the Board in 2015.

C. Clark Milton, DO, FACOI, is a general internist in Wheeling, W.V. A graduate of the West Virginia School of Osteopathic Medicine, Dr. Milton completed his residency training at the West Virginia University School of Medicine, where he was chief resident. Certified by the American Board of Internal Medicine, Dr. Milton is the Designated Institutional Official and Director of Medical Education at Wheeling Hospital. He also serves as Director of Corporate Health there. Dr. Milton has served on the ACOI Continuing Medical Education Committee for the past three years. He was appointed to the Board in November of 2018 to fill the remaining year of a term available as result of a resignation.

Samuel K. Snyder, DO, FACOI is Associate Professor and Chair of the Department of Medicine at Nova Southeastern

mm Hg on at least three separate clinic/office visits, with two separate measurements made at each visit. Patients should be followed over time. Those patients for which ABPM demonstrates BP > 135/85 mm Hg, may be at increased cardiovascular risk, and a physician may want to consider antihypertensive therapies. You can learn more by visiting https://www.cms.gov.

Washington Tidbits
Shared Vision Spanning Multiple Administrations
Each President brings his or her own vision for the country into the White House. It is a rare occasion when a vision spans multiple administrations and generations. The exploration of space and the requisite research into a multitude of scientific disciplines has provided this rare common ground.

With the enactment of the National Aeronautics and Space Act of 1958, President Dwight D. Eisenhower ushered in the start of the United States’ space program. The law created the National Aeronautics and Space Administration (NASA), a civil agency, designed to coordinate all space and aeronautical activities. This was precipitated by the successful launch and orbits of Russia’s Sputniks I and II in late 1957. In May of 1961, President John F. Kennedy provided further focus and commitment before a joint session of Congress by challenging the nation to, “Commit itself to achieving the goal, before this decade is out, of landing a man on the moon and returning him safely to earth.” It is this challenge, and the work of subsequent administrations from both sides of the aisle, that led to Neil Armstrong first setting foot on the moon on July 20, 1969. In the 50 intervening years since the first moon landing, each administration, Republican and Democrat, alike, has pushed our country to further explore and challenge our understanding of our world and our limitless universe. What will we achieve next?

• Infectious Disease • Interventional Cardiology • Nephrology • Oncology
• Pulmonary Diseases • Rheumatology • Sleep Medicine

Advanced Heart Failure and Transplant Cardiology Certifying Examination
Computerized Examination 300 Sites Nationwide

Further information and application materials are available by contacting Daniel Hart, AOBIM Director of Certification at admin@aobim.org; 312 202-8274.

Contact the AOBIM at admin@aobim.org for deadlines and dates for the Allergy, Sports Medicine, Pain Medicine, Undersea/Hyperbaric Medicine and Correctional Medicine examinations.

In Memoriam

Word has been received of the death of Dennis Jay McClary, DO, FACOI, of Tulsa, OK, on April 13, 2019. He was 60 years old. A 1986 graduate of the Oklahoma College of Osteopathic Medicine, Dr. McClary completed his internal medicine residency at OSU Medical Center and was certified by the AOBIM in 1991. He was an Active ACOI member from 1995 until the time of his death. He became an ACOI Fellow in 2002.

Member Milestone

Ray Page, DO PhD, of Fort Worth, TX, was recently recognized as a Fellow of the American Society of Clinical Oncology (ASCO). He was also named ASCO Advocate of Year, and is a mentor for ASCO’s newly-developed Healthcare Policy Fellowship Program. Dr. Page is President and Research Director at The Center for Cancer and Blood Disorders in Fort Worth. He completed the ACOI-University of Texas at Dallas Health Policy Certificate Program in Health-care Leadership and Management in 2013 and also serves as an ASCO delegate to the AMA.
