

# Ideas for meeting the Osteopathic Recognition Milestones

## PC 1: Osteopathic Principles for Patient Care

### 1. Evaluation of observed resident performance

Evaluation Question	Entrustment scale evaluation: The resident is trusted to participate in this activity:					Milestones Mapping
The resident incorporates the four tenets of osteopathic medicine in the History, PE, and care plan of the patient.	Only as an observer	With direct supervision	With indirect supervision	Independently	As an instructor of junior colleagues	OR-PC 1 OR-MK

### 2. Self-Reflection

- a. Require the resident to reflect and write/discuss a case in which he/she incorporated the four tenets of osteopathic medicine in a case. The reflection should include details of how this was reflected in the history/PE and care plan of the patient.
  - i. The residents reflection could be reviewed during a faculty/PD semi-annual evaluation
  - ii. Faculty/PD would have to assess the level of supervision the resident needed to incorporate these tenets (see above scale)

### 3. Review of records

- a. The resident could be responsible for bringing a copy of his/her patient note during a semi-annual evaluation. The resident can choose a case that he/she thinks best reflects incorporation of the osteopathic tenets into the care of the patient.
  - i. Faculty/PD would have to assess the level of supervision the resident needed to incorporate these tenets (see above scale)
