Final President's Letter

Dear ACOI Colleagues, Friends, and Family,

I am truly honored to be writing the last of my many newsletters as President of the ACOI. This has been a fascinating and memorable year serving you and our organization. Hopefully, you found my comments addressing issues, concerns, decisions, and information affecting us as osteopathic physicians helpful and relatable.

As an organization, we should be proud of all our accomplishments this year starting with our recent Annual Convention. ACOI 2023 was extremely successful. We brought together over 800 physicians, residents, and students onsite in Tampa with just as many participating online in our hybrid meeting for a total of over 1,600 attendees. The energy of a live meeting was palpable—our POCUS sessions were full and over 150 student and resident posters contributed to the energy and education of our attendees. Our keynote speakers were compelling and the depth of knowledge of our speakers was fantastic.

Our participation in the DO “Day on the Hill” is growing with senior leadership representing us as we advocate for our patients. We supported several pieces of legislation aimed at removing barriers to providing our patients with appropriate medical care.

We continue to be invited and attend meetings of other physician groups, including the AOA House of Delegates, American College of Physicians (ACP), and American Board of Internal Medicine (ABIM) where our contributions have meaning and purpose.

I was proud to attend the OMED23 meeting in Orlando last month along with our Executive Director Karen Caruth to accept the AOA 2023 Outstanding Affiliate Award on behalf of the ACOI. We were acknowledged by AOA President Ira Monka, DO, for working closely with AOBIM on member training and professional development initiatives. Through our efforts in sharing information about Osteopathic Continuous Certification (OCC) and the early entry Internal Medicine Primary Exam, we have created a greater understanding by members of the process.

The investment in our organization's future is evident through the successful growth in our student activities. Our student membership has grown with more representatives participating in our Student Osteopathic Internal Medicine Association (SOIMA) and engaging monthly SOLID lectures. We now have national student leaders who will guide us in understanding and fulfilling the needs of our future members.

I want to thank you for allowing me the honor of serving as President this year. I look forward to continuing my role on the Board of Directors as we look to our new President and my good friend, Robert Hasty DO, FACOI, to lead us through the upcoming year. Dr. Hasty has been active in the ACOI for many years and will continue navigating our strategic plan and will bring new energy and ideas to the role.

Many thanks to the Board of Directors, our senior leadership, support staff, and our members for contributing to our success. Whether you contributed through attendance at our educational programs, committee membership, our online learning platform, or membership dues, it was most appreciated.

As I close out this final newsletter, I want to thank my friends and family for all they have done to support me this year and always, especially my husband Kevin. As I said to him many times over the years, “I want to become President of the ACOI someday.”

Mission accomplished.

Joanne Kaiser-Smith, DO, MACOI

A Letter From Our New President

I am profoundly appreciative and excited to be the President of the American College of Osteopathic Internists and advance the mission to be the “premier community for osteopathic internists.”

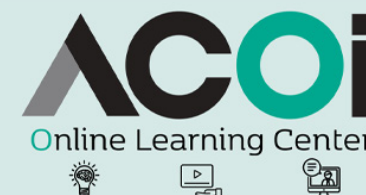

At [ACOI 2023](#) in Tampa, I had the opportunity to meet with so many of the previous past presidents of the ACOI who are legends in our profession. I am appreciative of them all, but most appreciative of my mentor, Joanne Kaiser-Smith, DO, MACOI, who did a terrific job during her tenure as President and who has guided and mentored me in preparation to ascend the presidency.

During the next year, I am excited to work with our incredible board and the excellent ACOI staff on our Strategic Goals:

1. Grow our ACOI community through engagement, inclusion, and belonging.
2. Connect members to education and tools that support their continued professional development and career advancement.
3. Amplify the voice of the community and provide leadership for the profession.
4. Influence physician wellbeing by promoting the balance of work, life, and their own health.
5. Build a strong, sustainable, and diverse membership association.

Through our Strategic Goals, I am confident that we will continue to advance this incredible organization to make a difference in the lives of all current and future osteopathic internists.

Robert T. Hasty, DO, FACO
president@acoi.org

Your Home for Osteopathic Internal Medicine Education

Free Pain Management Course

ACOI has partnered with the ACOFP to develop an interactive eight-course series, De-stress Pain Management: Rethinking Opioid and Non-Opioid Therapies. It's completely free and after completion you'll even receive a certificate!

Register for the free series and start with the first course available now: The Etiopathogenesis and Basics of Pain. Explore new courses through March 2024.

After completing the first course, you'll earn 0.75 AOA Category 1-A credits / 0.75 AMA PRA Category 1 Credits™ with the opportunity to earn a total of 5.5 credits once all courses launch.

[View Free Series](#)

ACOI Education Fulfills DEA Requirements

To meet the conditions of the Medication Access and Training Expansion (MATE) Act, the Drug Enforcement Administration (DEA) has issued new requirements. ACOI can help! Fulfill all eight hours of DEA training through the [ACOI Online Learning Center](#).

Over 1,600 Attend ACOI 2023

There's Still Time to Attend Virtual Sessions—[Register Now](#)

Whether attendees were onsite in Tampa, Florida or chose to participate via the virtual option, [ACOI 2023](#) delivered world-class medical education, hands-on learning sessions, intriguing keynotes, and a plethora of networking events. With over 50 sessions, 60 speakers, and a record number of students and residents attending, it went down in the books as another memorable Annual Convention.

This year's theme, "Health, Wellness, or Medicine?" put a spotlight on the importance of self-care for physicians. True to the theme, international fitness guru and ACOI keynote speaker, Tony Horton, passionately presented his **11 Laws that Will Change Your Life**. His enthusiasm for a fitness-focused lifestyle had attendees up on their feet, laughing, and lining up after his session to meet the famous exercise expert and best-selling author.

Point-of-Care Ultrasound (POCUS) and OMM training sessions gave participants a break from seated lectures and provided an opportunity to participate in hands-on skill building. POCUS training covered: basic POCUS techniques, Pearls POCUS, musculoskeletal, and cardiology. On Thursday night, meet-up sessions brought together old and new friends for cocktails, hors d'oeuvres, and thought-provoking discussions on topics specific to women physicians, LGBTQIA+ physicians, early career physicians, and physician wellness.

Interested in watching the session highlights below? You still have time. All recorded sessions are available on the virtual platform through December 15. [Register now.](#)

AOBIM board certified physicians can earn a maximum of 47.5 AOA Category 1A Credits. ABIM board certified physicians can earn up to 44.5 MOC Points in the American Board of Internal Medicine's (ABIM) Maintenance of Certification (MOC) program. ACOI also designates this meeting for a maximum of 47.5 AMA PRA Category 1 Credits™.

Wednesday, October 11

Physician Wellness - The Art of Saying No

The expert panel included Jeffrey M. Krepps, PhD; Julie Sterbank, DO, FACOI; Angela De Hamer, DO, FACOI; David L. Tolentino, DO, FACOI; Joanne K. Baker, DO, FACOI; Christine M. Samsa, DO, FACOI, and Kristine Cooper, DO.

Framing the discussion around academic models for positive workplace functioning and wellbeing, the panel reviewed a real-life wellness case and suggested potential solutions along with welcoming questions and suggestions from audience members. Panel members noted that being highly accomplished, physicians often find it difficult to admit when they need help. Panel members stressed the importance in understanding that physicians need to be the best version of themselves before looking to care for others, a reality that is true regardless of whether you are an early-career physician or if you've been practicing for many years.

WATCH NOW

The Florida Aquarium was the perfect backdrop for the Welcome Reception where buffet stations and beverages were served. Attendees strolled through and marveled at penguins, sharks, poison dart tree frogs, and many other exotic and wild creatures while socializing with friends and colleagues.

High Quality CPR

Led by Samuel Rodriguez, MD, "High Quality CPR" discussed the concept of the Arrest Cycle and explained the importance of an algorithmic approach to cardiac arrest. Dr. Rodriguez began by presenting the case of a 45-year-old man who had coronary artery stents and showed risk of coding. He discussed that the resuscitation process is most successful when there is early recognition and early defibrillation. In reviewing the adult cardiac arrest algorithm, he said data reveals that most of the time teams give rapid compressions; the problem with faster-than-recommended compressions is that the necessary depth necessary for effectiveness is typically sacrificed.

- 1,600+ attendees
- 400+ residents and students attending
- 150+ poster presentations
- 35 new Fellows inducted
- 15 new Master Fellows inducted
- 9 Alumni Receptions
- 6 Point-of-Care Ultrasound Sessions
- 4 award winners
- 4 meet-up discussion groups
- 2 keynote sessions

Thursday, October 12, 2023

Gut Microbiome

Charlene A. LePane DO, MSPH, FACG, FASGE, FACOI, led the discussion by explaining the facts of microbiome, where it exists and what is currently understood about it. The human body is host to trillions of microbes, collectively known as microbiome.

They can account for up to 1-3% total body mass in a human being forming a symbiotic relationship within the body.

Providing a comprehensive view of the gut microbiome, Dr. LePane emphasized that not all bacteria are harmful. She explained that the proliferation of good bacterial flora is vital for contributing to the normal functioning of the digestive system, aiding the immune system, helping to synthesize vitamins, and providing protection from carcinogens.

WATCH NOW

Anti-Inflammatory Diets: How Effective Are They?

Rheumatologist, Monica D. Shah, DO, FACR, enlightened the crowd about the efficacy of anti-inflammatory diets.

As the popularity of cookbooks, articles, and online information on inflammation and anti-inflammatory diets grows in popular culture, Dr. Shah emphasized that this is a good time for physicians to understand the role of diets on chronic inflammation.

She explained the fundamentals of inflammation and its impact on human health, the difference between acute inflammation and chronic inflammation, how inflammation is measured and the dangers of inflammation. While there can be numerous causes of inflammation, including smoking, obesity, exposure to dust/chemical periodontal disease, and chronic stress, her presentation focused on the problem with inflammatory foods and the potential benefits of anti-inflammatory diets.

Keynote: The Pros & Cons of AI in Healthcare

With recent advances in artificial intelligence (AI), the ACOI Program Committee decided there was no better time to review the concerns, thoughts, and promise of AI than live on stage at ACOI 2023. Two sides of AI's potential in medicine were presented by Humera (Mena) Kahn, MD, and Deanah Jibril, DO, MS, MBA. The physicians led Friday's featured presentation focusing on how AI is increasingly becoming an integral part of modern healthcare and the advantages and concerns it presents in diagnosing, treating, and even preventing disease.

Dr. Kahn reviewed how AI in healthcare encompasses a wide range of applications and tools designed to enhance the efficiency, accuracy, and effectiveness of healthcare services. She advocated that AI technologies offer great potential to improve a multitude of aspects of medicine, including healthcare delivery, diagnosis, treatment, and research. She listed the benefits of AI and explained to the audience that, with oversight, AI is the best way to move healthcare forward.

Representing the opposing view, Deanah Jibril, DO, MS, MBA presented her thoughts on AI and her concerns about autonomy and liability for the decisions made using machine learning. She expressed concerns that AI is basically comprised of data collection from scouring the web. She agrees that AI has the capability of speeding up decision making and can provide faster referrals.

Continued

Over 1,600 Attend ACOI 2023

(Continued)

She said it also can increase knowledge database which ultimately can mean a faster time to making a diagnosis as it sorts through the massive amounts of data inherent in the changing field of medicine.

WATCH NOW

Infectious Diseases: Late Breakers

MarkAlain Dery, DO, MPH, FACOI, discussed recent updates in the world of infectious diseases (ID). The overview spanned a variety of ID concerns, including DoxyPep, PEPFAR, Hansen's Disease, Candida Auris, and avian influenza.

Dr. Dery discussed the role of DoxyPep in preventing sexually transmitted infections (STIs). Doxycycline is a class of medications traditionally used to treat bacterial STIs after someone has been infected, but recent studies indicate it can also be effective in preventing chlamydia, gonorrhea, and syphilis infections. While physicians are typically conservative in prescribing antibiotics, he recommended that all physicians be liberal in their prescribing practice of DoxyPep given the recent evidence of effective STI prevention.

He explained the risk of not continuing to fund an international program called PEPFAR. He outlined that the current resistance in Congress is endangering the two-decade old program that has been credited in helping to slow the HIV pandemic and in saving an estimated 25 million lives.

Recognizing and Approaching the Impaired Physician

"When you don't offer help, you violate our oath." Thomas F. Jan, DO, certified in pain and in addiction medicine, spoke frankly to the audience gathered for his Saturday morning talk about the obligations physicians have in approaching a colleague they may believe is impaired due to drugs, alcohol, or mental illness. He reported that 8-12% of physicians will develop a substance abuse problem at some point in their careers.

During his presentation he reviewed which specialties are most at risk of abusing substances and what substance is the most abused. He noted that compared with the general population, physicians have higher rates of prescription drug abuse, particularly benzodiazepines and opioids, and that there is an increased risk for physicians to develop abuse during their residency training.

WATCH NOW

Treatment Recommendations for Use of Thiazides in Chronic Kidney Disease

David S. Levy, DO, FASN, introduced what kidney disease is and the pathophysiology, renal physiology, evidence, current guidelines, and treatment recommendations of thiazides for prevention of nephrolithiasis (kidney stones). Although not FDA approved for kidney stone prevention, thiazides have been an effective cornerstone of pharmacologic prevention of kidney stone recurrence for decades.

Dr. Levy reviewed previous studies conducted in the 1980s on kidney stone prevention and the trials that established the common use of thiazide diuretics before providing a detailed review of a controversial trial published in the March 2023 edition of the *New England Journal of Medicine*. While the NEJM article challenges the traditional treatment of kidney stones with thiazides, he believes there is conclusive evidence that the decades old drug therapy is still the best treatment.

Announced and Awarded at ACOI 2023

Board Appointments

On October 14, 2023, at the Annual Member Meeting, ACOI officially announced the Board of Directors appointments. Susan M. Enright, DO, FACO, was appointed President-Elect. Damon L. Baker, DO, FACO, was appointed Secretary/Treasurer. Pamela S. N. Goldman, DO, FACO, and Joanne K. Baker, DO, FACO, were new appointments, and incumbents Watson Ducatel, DO, MPH, FACO, and Charlene A. LePane, DO, FACO, have been approved for renewal of their positions for another three-year term. [Read more](#) about each leader. [John A. Arthur, DO](#) was appointed Resident Representative.

ACOI [previously announced](#) the appointment of Robert T. Hasty, DO, FACO, FACP, as President for 2023-2024.

In addition, ACOI thanks Past President, Michael A. Adornetto, DO, MBA, FACO, as he exits the Board after 13 years of service.

Poster Contest Winners

The top 3 winners in each category of this year's Resident, Fellow, and Student Poster Contests were chosen out of over 150 finalists.

Resident and Fellow Research Abstracts

1st Place

Development and Evaluation of a Virtual Reality Simulation Environment for Cardiology Education: A Pilot Study—Chris Jacob, DO

2nd Place

Fluid Resuscitation in Acute Pancreatitis: A Balancing Act for Patients with Congestive Heart Failure Exacerbation Using National Inpatient Sample (NIS) Data From 2016-2020—Het Patel, DO & Nisha Sanghani, DO

3rd Place

Use of FIB-4 Score Among Those at Risk for Fatty Liver Disease—Corbin Walters, DO & Reagan Livingston, DO

Resident and Fellow Case Presentations

1st Place

Anticoagulation Management in Loeys-Dietz Syndrome with Atrial Fibrillation: A Case Report and Review of Literature—Suhas Tatapudi, DO

2nd Place

MOGAD Masquerading as Mucormycosis—Sannah Vasaya, DO

3rd Place

GATA2 Deficiency: A Mystery Myelodysplasia—Ashley Pickney, DO (Represented by Raziya Shoaib, DO)

Student Research Abstracts

1st Place

Does Early Ablation Impact Atrial Fibrillation Outcomes?—Nicholas Philip, OMS-IV

2nd Place

Atrial Fibrillation in Patients with COVID-19 Infection: A Single-Center Retrospective Chart Review—Dakota Becker-Greene, OMS-III

3rd Place

MET, Her2 and p53 Alterations and Osimertinib Resistance in EGFR Mutant Non-small Cell Lung Cancer Patients: A Meta-Analysis—Hannah Caldwell, OMS-II

Student Case Presentations

1st Place

Sarcoid-Like Reaction to Disseminated Pulmonary Cryptococcosis in an Immunocompromised Vaper—Susanna Sogge, OMS-IV

2nd Place

Hidden in the Wall: Chronic Lymphocytic Leukemia Disguised as Chronic Cholecystitis—Austin Bordelon, OMS-IV

3rd Place

A Case Report: Musculoskeletal Injuries Among Unaccompanied Migrant Youth: Lateral Bucket Handle Meniscal Tear—Eleana Estrella, OMS-IV

Announced and Awarded at ACOI 2023 (Continued)

Fellows, Master Fellows, and Awards

On October 13, 2023, at the Convocation of Fellows and Awards Ceremony, 35 new Fellows and 15 Master Fellows were inducted. Among this year's roster of new Fellows and Master Fellows were two Father-Son duos!

Robert L. DiGiovanni, DO, MACOI, and Monica DiGiovanni with their son Ernest L. DiGiovanni, DO, FACOI.

Jeffrey A. Gulick, DO, FACOI, and father Peter G. Gulick, DO, MACOI

As previously announced, awards for Internist of the Year, Researcher of the Year, Teacher of the Year, and The Presidential Citation were also presented at the Ceremony. Read about the winners [on our blog](#).

ACOI Communities—Now Open!

Introducing ACOI Communities, a new online platform created exclusively for our members.

On this easy-to-use platform, you'll be able to join discussions, connect with other members, and more.

To support the launch of ACOI Communities and improve security, ACOI has developed a new User Dashboard where you can update your information, pay dues, access benefits, and more.

The best part is that as an ACOI member, your account is already active.

Ready to get started?

Step 1: Login to the new **User Dashboard**.

Login with your existing ACOI Online Learning Center (OLC) account credentials. If you don't have a password, click on [Forgot your password](#). Once you're logged in, scroll down to **Community & Education** and click on **ACOI Communities**.

Step 2: Update your profile information.

Click on the **Upload a Photo** icon to add a photo and update your profile.

Step 3: Start posting!

On the top navigation, click on **Communities** and then **My Communities**. Select **Member Discussion Group**. Find a thread that you'd like to read and reply or post a new message.

If you need help, check out the **Getting Started** page for videos and tutorials.

ACOI Member News

In Memoriam

ACOI is saddened to learn of the passing of Thomas W. Allen, DO, MPH, MACOI. Dr. Allen served as President of the ACOI from 1986-1987. In 1991, Dr. Allen relocated from New Jersey to Oklahoma to become Vice President for Health Affairs at Oklahoma State

and Dean of its College of Osteopathic Medicine in Tulsa. In 1995 he took over the team physician role for the Cowboy wrestling team and continued on in the role until 2020. For his many years of devotion to the sport of wrestling, Allen was honored with the Lifetime Service Award by the Oklahoma Chapter of the National Wrestling Hall of Fame in 2012.

ACOI Receives the AOA Outstanding Affiliate Award

Thank you to the American Osteopathic Association for awarding ACOI the Outstanding Affiliate Award at OMED 23!

We are proud to work with partners to help advance the osteopathic medical profession through activities benefiting DOs, our In-Service Exam, and more.

[Read more](#) about all of this year's award winners.

AOF/ACOI 2023 Outstanding Resident of the Year

Congratulations to Michael Joseph Matthews, DO, who was recently awarded the AOF/ACOI 2023 Outstanding Resident of the Year in Internal Medicine at the 2023 AOF Honors Gala!

His commitment to outstanding service and scholarship makes us all proud. Way to go!

Albertus Magnus College Alumni of the Year

Congratulations to Mary Schaefer Badger, DO, FACOI, FAWM, newly named recipient of the Albertus Magnus College 2023 Alumni of the Year Award for her exceptional commitment to helping others through community service and professional achievement. Join us

in applauding Dr. Schaefer Badger for her phenomenal leadership and outstanding contributions!

AOF Lifetime Achievement Award

ACOI Past-President Karen J. Nichols, DO, MACOI, received the AOF 2023 Lifetime Achievement Award. The award is given to an individual whose extraordinary accomplishments and service bring a sense of pride to the

osteopathic profession and achieves greatness through integrity, commitment to service, generosity and community involvement. Join us in congratulating Dr. Nichols on this well-deserved award!

Xavier University proposed COM Dean Named

Congratulations to Steven J. Halm, DO, FACOI, named founding dean of Xavier University's proposed College of Osteopathic Medicine! Dr. Halm will officially begin this role on Feb. 1, 2024, and we look forward to working with him to advance his vision as we prepare

for the opening of the new COM.

Detroit Top Docs of 2023

Hour Detroit announced the 2023 leading physicians of the metro Detroit area, as chosen by their peers. This year's list included several ACOI members: David Gowman, DO, FACOI, Mohamad A. Sobh, DO, Eric S. Langer, DO, MACOI, Michael Raphael, DO, FACOI, Harold Margolis, DO, FACOI, Cynthia M. Vakhariya, DO, Richard P. Zekman, DO, FACOI, Steven M. Katzman, DO, FACOI, Andrew Cykiert, DO, FACOI, Amy Engelhardt, DO, FACOI, Benjamin M. Rossi, DO, FACOI, Tania B. Little, DO, FACOI, Deborah Borowski, DO, FACOI, Christopher J. Webster, DO, FACOI, Craig J. Gordon, DO, FACOI, and Michael R. Laffer, DO, FACOI. Congratulations to all!

Get Involved—Join an ACOI Committee

Make a difference and represent the community by joining an ACOI committee. Committees advance advocacy efforts, build education products, write pieces for online publications, and more.

Active and resident members of the ACOI who are interested in serving on an ACOI committee are invited to fill out the [nomination form](#).

Committees are generally selected in December of each year, and applications will stay on file when submitted at any time.

[Learn more about each of our committees](#). If you have any questions, please contact Susan Stacy at susan@acoi.org.

Upcoming ACOI Events

2024 Annual Convention & Scientific Sessions

October 30-November 3

Kierland Resort, Scottsdale, AZ

Vision

Osteopathic internists are practicing Principle-Centered Medicine™ and thriving in their personal and professional lives.

Mission

As the premier community for osteopathic internists, ACOI provides leadership, networking, and education to help our members be successful and stay true to why they pursued medicine.

[Visit our website](#) to learn more.
